1983 *AIAA Journal* Index

How to Use the Index

In the Subject Index, pages 1779-1788; each technical paper is listed under a maximum of three appropriate headings. Note the number in boldface type following each paper title, and use that number to locate the paper in the Chronological Index. The Author Index, pages 1788-1790, lists all authors associated with a given technical paper. The locating numbers are identical to those in the Subject Index. The Chronological Index, pages 1790-1800, lists all papers by their unique code numbers. This listing contains titles, authors and their affiliations, and volume, issue number, and page where the paper appeared. It also gives the AIAA paper number, if any, on which the article was based, as well as the "CP" or conference volume number if the paper was published in a bound collection of meetings papers. Comments, Replies, and Errata are listed directly beneath the paper to which they refer. If the paper to which they refer was published prior to 1983, that paper also will appear in both the Subject and Chronological Indexes. Authors of Comments also are listed in the Author Index.

Subject Index

Aircraft Technology, Conventional, STOL/VTOL

Aerodynamics

Visualization of Flow Patterns Induced by an Impinging Jet Issuing from a Circular Planform J83-328
Cellular Patterns in Poststall Flow over Unswept Wings J83-324
Thickness and Camber Effects in Slender Wing Theory J83-323
Three-Dimensional Flowfield Inside a Low-Speed Axial Flow Compressor Rotor J83-312
Effect of Edge-Tone Noise on Supercritical Airfoil Data J83-294
Numerical Study of the Turbulent Flow Past an Airfoil with Trailing Edge Separation J83-283
Conservative Full-Potential Calculations for Axisymmetric, Transonic Flow J83-278
Engine Power Simulation for Transonic Flow-Through Nacelles J83-270
Combined Four-Wall Interference Assessment in Two-Dimensional Airfoil Tests J83-252
Design of Supercritical Cascades with High Solidity J83-240
A Vortex Sheet Method for Calculating Separated Two-Dimensional Flows J83-205
Three-Dimensional Flow Studies on a Slotted Transonic Wind Tunnel Wall J83-187
Seven-Hole Cone Probes for High Angle Flow Measurement: Theory and Calibration J83-186
Investigation of Two Plane Parallel Jets J83-185
Numerical Calculation of Nonlinear Aerodynamics of Wing-Body Configurations J83-177
Force and Moment in Incompressible Flows J83-169
Compressible Helicoidal Surface Theory for Propeller Aerodynamics and Noise J83-164
Numerical Solution of Transonic Wing Flowfields J83-162
A More Accurate Transonic Computational Method for Wing-Body Configurations J83-160
A Finite Element Algorithm for Computational Fluid Dynamics J83-156
Induced Drag of a Slender Wing in a Nonuniform Stream J83-143
Shock Reflection Transition in Three-Dimensional Steady Flow About Interfering Bodies J83-133
Compressible Turbulent Boundary Layer in Strong Adverse Pressure Gradient J83-120
Oil Flow Separation Patterns on an Ogive Forebody J83-108
An Interaction Algorithm for Three-Dimensional Turbulent Subsonic Aerodynamic Juncture Region Flow J83-105
A Higher Order Panel Method Applied to Vortex Sheet Roll-Up J83-104
Visualization of Multijet Impingement Flow J83-098
Transonic Airfoil Calculations Using Solution-Adaptive Grids J83-055
A Finite State Aerodynamic Model for a Lifting Surface in Incompressible Flow J83-033
Numerical Prediction of Dynamic Forces on Arbitrarily Pitched Airfoils J83-032
Approximate Calculation of Vortex Trajectories of Slender Bodies at Incidence J80-270

Aeroelasticity

Minimum-Weight Design of an Orthotropic Shear Panel with Fixed Flutter Speed J83-190
Unified Panel Flutter Theory with Viscous Damping Effects J83-141
Quadrature Formulas for Chordwise Integrals of Lifting Surface Theories J83-085
Flutter of Orthotropic Panels in Supersonic Flow Using Affine Transformations J83-052
Linear/Nonlinear Behavior in Unsteady Transonic Aerodynamics J83-005

Fuels and Fuel Systems

Penetration and Breakup of Slurry Jets in a Supersonic Stream J83-195

General Aviation

The Dynamic Collapse of a Column Impacting a Rigid Surface J83-223

Ground Effect Machines

Visualization of Multijet Impingement Flow J83-098

Helicopters

Vortex and Momentum Theories for Hovering Rotors J83-293
Derivation of the Fundamental Equation of Sound Generated by Moving Aerodynamic Surfaces J83-197 J83-094
Equivalent G/E of Helicopter Rotor Blades J83-093

Landing Dynamics

Analysis of a Thin-Walled Pressurized Torus in Contact with a Plane J83-219

Noise

Effect of Edge-Tone Noise on Supercritical Airfoil Data J83-294
Derivation of the Fundamental Equation of Sound Generated by Moving Aerodynamic Surfaces J83-197
Constraints on the Invariant Functions of Axisymmetric Turbulence J83-184
Mode Propagation in Nonuniform Circular Ducts with Potential Flow J83-183
Spectral Analysis Algorithms for the Laser Velocimeter: A Comparative Study J83-134
Analytical Model of Jet Shielding J83-131
Shock-Associated Noise in Supersonic Jets J83-130
Conventional Profile Coaxial Jet Noise Prediction J83-067

Effect of Excitation on Coaxial Jet Noise J83-042
Eigensolutions for Liners in Uniform Mean Flow Ducts J83-041
Acoustics in Variable Area Duct:Finite Element and Finite Difference Comparisons to Experiment J83-040
Theoretical and Experimental Evaluation of Transmission Loss of Cylinders J83-039
Sound Propagation in Multistage Axial Turbomachines J83-014

Performance

Thrust Augmenting Ejectors, Part II J83-315
Thrust Augmenting Ejectors, Part I J83-262

Propeller and Rotor Systems

Vortex and Momentum Theories for Hovering Rotors J83-293
Finite Volume Calculation of Three-Dimensional Potential Flow Around a Propeller J83-253
Some Analysis Methods for Rotating Systems with Periodic Coefficients J83-165
Compressible Helicoidal Surface Theory for Propeller Aerodynamics and Noise J83-164
Equivalent G/E of Helicopter Rotor Blades J83-093

Structural Design (including Loads)

The Fracture Diagram: A New Design Tool for Stiffened Panels J83-241
Analysis of a Thin-Walled Pressurized Torus in Contact with a Plane J83-219
Generic Buckling Curves for Specially Orthotropic Rectangular Plates J83-217
An Alternating Method for Analysis of Surface-Flawed Aircraft Structural Components J83-139
Geometrically Nonlinear Transient Analysis of Laminated Composite Plates J83-118

Structural Materials

One-Dimensional Micromechanical Analysis of Woven Fabric Composites J83-317
Geometrically Nonlinear Transient Analysis of Laminated Composite Plates J83-118

Testing, Flight and Ground

Wind Tunnel Wall Corrections Deduced by Iterating from Measured Wall Static Pressure J83-310
Review of Support Interference in Dynamic Tests J83-309
The Single-Cycle Scheme: A New Approach to Numerical Optimization J83-307
Combined Four-Wall Interference Assessment in Two-Dimensional Airfoil Tests J83-252
Three-Dimensional Flow Studies on a Slotted Transonic Wind Tunnel Wall J83-187
Hydrodynamic Added-Mass Identification from Resonance Tests J83-116

Vibration

Vibration of Triangular Plates J83-271
Large-Amplitude Vibration of an Initially Stressed Thick Circular Plate J83-244
Nonlinear Inverse Perturbation Method in Dynamic Analysis J83-243
Transverse Vibrations of Nonuniform Rectangular Orthotropic Plates J83-198
Dynamic Modeling of Structures from Measured Complex Modes J83-166
Unified Panel Flutter Theory with Viscous Damping Effects J83-141
Flutter of Orthotropic Panels in Supersonic Flow Using Affine Transformations J83-052
Finite Elements for Initial Value Problems in Dynamics J81-258

Energy

Combustion

Linearized Unsteady Flame Surface Approximation Result in Complex Notation J83-331
Erosive Burning J83-313
Turbulence Measurements in Confined Jets Using a Rotating Single-Wire Probe Technique J83-301
Predictions of the Structure of Turbulent, Particle-Laden Round Jets J83-276
Steady-State Evaporation Characteristics of Hydrocarbon Fuel Drops J83-263
Acoustic Signature from Flames as a Combustion Diagnostic Tool J83-210
Fluorescence Measurements of OH in a Turbulent Flame J83-209
Boron Particle Ignition in a Restricted Thermodynamical Equilibrium J83-188
Numerical Studies of Laminar Flame Propagation in Spherical Bombs J83-078
Application of the Finite-Element Method to One-Dimensional Flame Propagation Problems J83-049
Radiative Transfer in Spectrally Dissimilar Absorbing-Emitting-Scattering Adjacent Mediums J83-019

Lasers

Theoretical Study of Discharge Confinement in an Electron-Beam-Controlled Laser Discharge Cavity J83-287
Snowing Criteria for Cold Traps J83-269
Computation of Reacting Flowfield with Radiation Interaction in Chemical Lasers J83-239

Magnetohydrodynamics

Conductivity Measurements of Phosphorus-Doped Potassium-Seeded MHD Plasmas J83-308
Experimental and Theoretical Study of Hall Field Limitations in MHD Generators J83-304
Joule Heating Effects in MHD Generator Boundary Layers J83-129

Nuclear Fusion

Phenomenological Model Describing Orificed, Hollow Cathode Operation J83-001

Reciprocating Machinery

Computed and Measured Turbulence in Axisymmetric Reciprocating Engines J83-115

Rotating Machinery

Blade Loss Transient Dynamic Analysis of Turbomachinery J83-214
Blade Loading and Rotation Effects on Compressor Rotor Wake Near End Walls J83-077

Solar Thermal Power

Performance of a Cylindrical Phase-Change Thermal Energy Storage Unit J83-142

Fluid Dynamics

Aeroacoustics

Decomposition of a Disturbance in Parallel Shear Flows J83-326
Effect of Edge-Tone Noise on Supercritical Airfoil Data J83-294
Nonsteady Flame Spreading in Two-Dimensional Ducts J83-288
Supersonic Jet Screech Tone Cancellation J83-285
The Response of Normal Shocks in Diffusers J83-256
Characteristic Frequencies of Transonic Diffuser Flow Oscillations J83-232
An Aeroacoustic Model for High-Speed, Unsteady Blade-Vortex Interaction J83-231
Acoustic Signature from Flames as a Combustion Diagnostic Tool J83-210
Acoustic Interaction with a Turbulent Plane Jet--Some Effects on Turbulent Structure J83-201
Derivation of the Fundamental Equation of Sound Generation by Moving Aerodynamic Surfaces J83-197
Constraints on the Invariant Functions of Axisymmetric Turbulence J83-184
Mode Propagation in Nonuniform Circular Ducts with Potential Flow J83-183
Edge Tones in High-Speed Flows and Their Application to Multiple-Jet Mixing J83-178
Effects of Artificial Excitation upon a Low Reynolds Number Mach 2.5 Jet J83-174
Compressible Helicoidal Surface Theory for Propeller Aerodynamics and Noise J83-164
Aerodynamic Theory for Wing with Side Edge Passing Subsonically through a Gust J83-155
Nonlinear Resonant Interactions in Internal Cavity Flows J83-145
Spectral Analysis Algorithms for the Laser Velocimeter: A Comparative Study J83-134
Analytical Model of Jet Shielding J83-131
Shock-Associated Noise in Supersonic Jets J83-130
Oscillations of Impinging Shear Layers J83-126
Wind Tunnel Noise Reduction at Mach 5 with a Rod-Wall Sound Shield J83-125
Wall Pressure Fluctuations in Attached Boundary-Layer Flow J83-101
Pressure Wave Attenuation Due to Anode Mufflers in Pulsed Lasers J83-074
Self-Excited Wave Oscillations in a Water Table J83-072
Conventional Profile Coaxial Jet Noise Prediction J83-067
Screech Suppression in Supersonic Jets J83-045
Aerosound from Corner Flow and Flap Flow J83-044
Sound Source Radiation in Two-Dimensional Shear Flow J83-043
Effect of Excitation on Coaxial Jet Noise J83-042
Eigensolutions for Liners in Uniform Mean Flow Ducts J83-041
Acoustics in Variable Area Duct:Finite Element and Finite Difference Comparisons to Experiment J83-040
Theoretical and Experimental Evaluation of Transmission Loss of Cylinders J83-039
Length and Time Scales Relevant to Sound Generation in Excited Jets J83-023

Sound Propagation in Multistage Axial Turbomachines J83-014
Modal Power Distribution in Ducts at High Frequencies J83-010

Boundary Layers and Convective Heat Transfer-Laminar

Accuracy of Approximations to the Navier-Stokes Equations J83-325
Correlation of Hypersonic Stagnation Point Heat Transfer at Low Reynolds Numbers J83-295
Snowing Criteria for Cold Traps J83-269
The Two-Dimensional Laminar Wake with Initial Asymmetry J83-249
Stagnation Point Heat Transfer for Jet Impingement to a Plane Surface J83-229
Decay of Streamwise Vorticity Downstream of a Three-Dimensional Protuberance J83-161
Influence of Finite Slot Size on Boundary Layer with Suction or Injection J83-122
Ignition Dynamics of Fully Reactive Propellant in Stagnation Flow J83-112
Evaluation of Total Body Heat Transfer in Hypersonic Flow J83-089
Correlation of Preston Tube Data with Laminar Skin Friction J83-073
Experiments on Natural Convection Heat Transfer in Low Aspect Ratio Enclosures J83-053
Streamwise Corner Flow with Wall Suction J83-004

Boundary Layers and Convective Heat Transfer-Turbulent

Erosive Burning J83-313
Unsteadiness of the Separation Shock Wave Structure in a Supersonic Compression Ramp Flowfield J83-305
A Study of Turbulent Flow Downstream of an Abrupt Pipe Expansion J83-258
Prediction of Curved Channel Flow with an Extended k-ϵ Model of Turbulence J83-254
Boundary-Layer and Turbulence Intensity Measurements in a Shock Wave/Boundary-Layer Interaction J83-250
Turbulence Modeling for Computational Aerodynamics J83-180
Analytical Approximation of Two-Dimensional Separated Turbulent Boundary-Layer Velocity Profiles J83-175
Separated Trailing-Edge Flow at a Transonic Mach Number J83-154
Joule Heating Effects in MHD Generator Boundary Layers J83-129
Compressible Turbulent Boundary Layer in Strong Adverse Pressure Gradient J83-120
A Method of Predicting Unsteady Turbulent Flows and Its Application to Diffusers with Unsteady Inlet Conditions J83-106
Prediction of Rough-Wall Skin Friction and Heat Transfer J83-103
Freestream Turbulence Effects on Attached Subsonic Turbulent Boundary Layers J83-102
Wall Pressure Fluctuations in Attached Boundary-Layer Flow J83-101
Riblets as a Viscous Drag Reduction Technique J83-099
Freestream Tubulence and Transonic Flow over a "Bump" Model J83-086
Flow Visualization Methods for Separated Three-Dimensional Shock Wave/Turbulent Boundary-Layer Interactions J83-075
Unsteady Transonic Flow over Wings Including Inviscid/Viscous Interaction J83-071
Effect of Pulsed Slot Suction on a Turbulent Boundary Layer J83-056
Experimental Investigation of Turbulence Properties in Transonic Shock/Boundary-Layer Interactions J83-038
Upstream Influence in Sharp Fin-Induced Shock Wave Turbulent Boundary-Layer Interaction J83-021
A Model for the Backflow Mean Velocity Profile J83-020
Correlation of the Detachment of Two-Dimensional Turbulent Boundary Layers J83-009
Improved Method for the Measurement of Turbulence Quantities J82-027

Boundary-Layer Stability and Transition

Effects of Suction on the Gortler Instability of Boundary Layers J83-306
Natural Instability of Free Shear Layers J83-281
The Boundary Layer on an Axisymmetric Body With and Without Spin J83-277
Effect of Surface Roughness on the Delayed Transition on 9:1 Heated Ellipsoid J83-259
Further Experiments on Shock Tube Wall Boundary-Layer Transition J83-196
Single- and Multiple-Crater Induced Nosetip Transition J83-179
Viscous Stability of Compressible Axisymmetric Jets J83-097
A Review of Roughness-Induced Nosetip Transition J83-002
Inviscid Solution for the Secondary Flow in Curved Ducts J81-203

Computational Methods

Accuracy of Approximations to the Navier-Stokes Equations J83-325
Supersonic Flow over a Rearward Facing Step with Transverse Nonreacting Hydrogen Injection J83-316
Stability of Shock Waves Attached to Wedge and Cones J83-302
Comparison Between Navier-Stokes and Thin-Layer Computations for Separated Supersonic Flow J83-298
Implicit, Nonswitching, Vector-Oriented Algorithm for Steady Transonic Flow J83-296
A Composite Velocity Procedure for the Compressible Navier-Stokes Equations J83-286
Numerical Simulation of Flow Around a Three-Dimensional Turret J83-284
Numerical Study of the Turbulent Flow Past an Airfoil with Trailing Edge Separation J83-283
Application of a Finite Element Algorithm to the Solution of Steady Transonic Euler Equations J83-282
Computation of the Asymmetric Vortex Pattern for Bodies of Revolution J83-279
Conservative Full-Potential Calculations for Axisymmetric, Transonic Flow J83-278
A Multigrid Strongly Implicit Procedure for Transonic Potential Flow Problems J83-275
A Low Mach Number Euler Formulation and Application to Time-Iterative LBI Schemes J83-268
An Implicit Lambda Scheme J83-257
Prediction of Curved Channel Flow with an Extended k-ϵ Model of Turbulence J83-254
Finite Volume Calculation of Three-Dimensional Potential Flow Around a Propeller J83-253
Combined Four-Wall Interference Assessment in Two-Dimensional Airfoil Tests J83-252
A Discrete Vortex Simulation of Kelvin-Helmholtz Instability J83-248
Numerical Solution of Natural Convection in Eccentric Annuli J83-246
Computation of Reacting Flowfield with Radiation Interaction in Chemical Lasers J83-239
Spin-Up from Rest in a Differentially Rotating Cylinder J83-238
A Grid Overlapping Scheme for Flowfield Computations About Multicomponent Configurations J83-237
An Efficient, Full-Potential Implicit Method Based on Characteristics for Supersonic Flows J83-236
Prediction of Separated Asymmetric Trailing-Edge Flows at Transonic Mach Numbers J83-235
A Finite-Volume, Adaptive Grid Algorithm Applied to Planetary Entry Flowfields J83-234
Numerical Experiments with the Osher Upwind Scheme for the Euler Equations J83-233
Reynolds Stresses for Unsteady Turbulent Flows J83-227
Pseudospectral Approximation in a Three-Dimensional Navier-Stokes Code J83-226
Calculation of Various Diffuser Flows with Inlet Swirl and Inlet Distortion Effects J83-213
A Vortex Sheet Method for Calculating Separated Two-Dimensional Flows J83-205
Finite Element Methods for Transonic Flow Analysis J83-204
Applications of Exponential Splines in Computational Fluid Dynamics J83-202
A Variation on MacCormack's Method for Axisymmetric Viscous Compressible Flows J83-194
Turbulence Modeling for Computational Aerodynamics J83-180
Analytical Approximation of Two-Dimensional Separated Turbulent Boundary-Layer Velocity Profiles J83-175
Efficient Computation of Volume in Flow Predictions J83-172
Vorticity at the Shock Foot in Inviscid Flow J83-171
Bow Wave Patterns J83-168
A Split-Coefficient/Locally Monotonic Scheme for Multishocked Supersonic Flow J83-163
Numerical Solution of Transonic Wing Flowfields J83-162
Decay of Streamwise Vorticity Downstream of a Three-Dimensional Protuberance J83-161
A More Accurate Transonic Computational Method for Wing-Body Configurations J83-160
Transonic Flow Calculations Using the Euler Equations J83-159
An Implicit, Bidiagonal Numerical Method for Solving the Navier-Stokes Equations J83-157
A Finite Element Algorithm for Computational Fluid Dynamics J83-156
A Fuzzy Algorithm to Compute Transonic Profile Flow J83-146
Shock Reflection Transition in Three-Dimensional Steady Flow About Interfering Bodies J83-133
Euler Equations--Implicit Schemes and Boundary Conditions J83-132

Analytical Model of Jet Shielding J83-131
An Interaction Algorithm for Three-Dimensional Turbulent Subsonic Aerodynamic Juncture Region Flow J83-105
A Higher Order Panel Method Applied to Vortex Sheet Roll-Up J83-104
Nonlinear Truncation Error Analysis of Finite Difference Schemes for the Euler Equations J83-100
Numerical Studies of Laminar Flame Propagation in Spherical Bombs J83-078
Calculation of Symmetric Vortex Separation Affecting Subsonic Bodies at High Incidence J83-076
Pressure Wave Attenuation Due to Anode Mufflers in Pulsed Lasers J83-074
An Unsteady Interactive Separation Process J83-070
A Finite Element Formulation for Steady Transonic Euler Equations J83-068
Numerical Solution of Transonic Stream Function Equation J83-066
Transonic Airfoil Calculations Using Solution-Adaptive Grids J83-055
Application of the Finite-Element Method to One-Dimensional Flame Propagation Problems J83-049
Sound Source Radiation in Two-Dimensional Shear Flow J83-043
Effects of Mach Number on the Development of a Subsonic Rectangular Jet J83-036
Numerical Prediction of Dynamic Forces on Arbitrarily Pitched Airfoils J83-032
A Comparative Study of Time-Marching and Space-Marching Numerical Methods J83-022
A Fast Algorithm for the Calculation of Transonic Flow over Wing/Body Combinations J83-008
The Use of an Error Index to Improve Numerical Solutions for Unsteady Lifting Airfoils J83-006
Shock-Fitting Bicharacteristic Algorithm for Three-Dimensional Scarfed Nozzle Flowfields J83-003
Inviscid Solution for the Secondary Flow in Curved Ducts J81-203

Hydrodynamics

Decomposition of a Disturbance in Parallel Shear Flows J83-326
Effect of Surface Roughness on the Delayed Transition on 9:1 Heated Ellipsoid J83-259
Spin-Up from Rest in a Differentially Rotating Cylinder J83-238
Bow Wave Patterns J83-168
Hydrodynamic Added-Mass Identification from Resonance Tests J83-116
Evaluation of Total Body Heat Transfer in Hypersonic Flow J83-089
Self-Excited Wave Oscillations in a Water Table J83-072
Inviscid Axisymmetric Jet Impingement with Recirculating Stagnation Regions J83-069
Computer-Enhanced Analysis of a Jet in a Cross Stream J83-035
Numerical Evaluation of Principal Value Integral by Gauss-Laguerre Quadrature J83-024
Mechanism of Impact Pressure Generation from Spark-Generated Bubble Collapse Near a Wall J83-007

Jets, Wakes, and Viscid-Inviscid Flow Interactions

Influence of Suction on the Developing Wall Flow of an Impinging Jet J83-333
Visualization of Flow Patterns Induced by an Impinging Jet Issuing from a Circular Planform J83-328
Cellular Patterns in Poststall Flow over Unswept Wings J83-324
Thrust Augmenting Ejectors, Part II J83-315
Review of Support Interference in Dynamic Tests J83-309
Unsteadiness of the Separation Shock Wave Structure in a Supersonic Compression Ramp Flowfield J83-305
Turbulence Measurements in Confined Jets Using a Rotating Single-Wire Probe Technique J83-301
Applicability of the Independence Principle to Subsonic Turbulent Flow over a Swept Rearward-Facing Step J83-297
Combustion in a Turbulent Mixing Layer Formed at a Rearward-Facing Step J83-289
A Composite Velocity Procedure for the Compressible Navier-Stokes Equations J83-286
Numerical Simulation of Flow Around a Three-Dimensional Turret J83-284
Experimental Investigation of Curvature Effects on Ventilated Wall Jets J83-280
Predictions of the Structure of Turbulent, Particle-Laden Round Jets J83-276
Thrust Augmenting Ejectors, Part I J83-262
Detonation Propulsion Experiments and Theory J83-261
Dynamic Behavior of a Bluff-Body Diffusion Flame J83-260
The Two-Dimensional Laminar Wake with Initial Asymmetry J83-249
Prediction of Separated Asymmetric Trailing-Edge Flows at Transonic Mach Numbers J83-235
A Finite-Volume, Adaptive Grid Algorithm Applied to Planetary Entry Flowfields J83-234
Time-Resolved Two-Dimensional Concentration Measurements in an Acoustically Driven Flow J83-206
A Vortex Sheet Method for Calculating Separated Two-Dimensional Flows J83-205
Acoustic Interaction with a Turbulent Plane Jet--Some Effects on Turbulent Structure J83-201
Investigation of Two Plane Parallel Jets J83-185
Effects of Properties and Location in the Plume on Droplet Diameter for Injection in a Supersonic Stream J83-181
Edge Tones in High-Speed Flows and Their Application to Multiple-Jet Mixing J83-178
Compressibility Effects in Turbulent Shear Layers J83-176
Analytical Approximation of Two-Dimensional Separated Turbulent Boundary-Layer Velocity Profiles J83-175
Effects of Artificial Excitation upon a Low Reynolds Number Mach 2.5 Jet J83-174
Decay of Streamwise Vorticity Downstream of a Three-Dimensional Protuberance J83-161
Separated Trailing-Edge Flow at a Transonic Mach Number J83-154
Axial Wavenumber Measurements in Axisymmetric Jets J83-147
Shock-Associated Noise in Supersonic Jets J83-130
Modification of Subsonic Wakes Using Boundary Layer and Base Mass Transfer J83-127
Oscillations of Impinging Shear Layers J83-126
Instantaneous Turbulence Profiles in the Wake of an Oscillating Airfoil J83-124
Influence of Finite Slot Size on Boundary Layer with Suction or Injection J83-122
Compressible Turbulent Boundary Layer in Strong Adverse Pressure Gradient J83-120
Mean Flowfields in Axisymmetric Combustor Geometries with Swirl J83-114
A Higher Order Panel Method Applied to Vortex Sheet Roll-Up J83-104
Visualization of Multijet Impingement Flow J83-098
Viscous Stability of Compressible Axisymmetric Jets J83-097
Blade Loading and Rotation Effects on Compressor Rotor Wake Near End Walls J83-077
Flow Visualization Methods for Separated Three-Dimensional Shock Wave/Turbulent Boundary-Layer Interactions J83-075
An Unsteady Interactive Separation Process J83-070
Inviscid Axisymmetric Jet Impingement with Recirculating Stagnation Regions J83-069
Hot-Film Anemometer Measurements in a Starting Turbulent Jet J83-057
Aerosound from Corner Flow and Flap Flow J83-044
Experimental Investigation of Turbulence Properties in Transonic Shock/Boundary-Layer Interactions J83-038
Atomization of Imping Liquid Jets in a Supersonic Crossflow J83-037
Effects of Mach Number on the Development of a Subsonic Rectangular Jet J83-036
Computer-Enhanced Analysis of a Jet in a Cross Stream J83-035
Length and Time Scales Relevant to Sound Generation in Excited Jets J83-023
Upstream Influence in Sharp Fin-Induced Shock Wave Turbulent Boundary-Layer Interaction J83-021
Rayleigh Scattering Measurements of the Gas Concentration Field in Turbulent Jets J83-011
Correlation of the Detachment of Two-Dimensional Turbulent Boundary Layers J83-009
Improved Method for the Measurement of Turbulence Quantities J82-027
Approximate Calculation of Vortex Trajectories of Slender Bodies at Incidence J80-270
Karman Vortex Shedding and the Effect of Body Motion J80-177

Multiphase Flows

Predictions of the Structure of Turbulent, Particle-Laden Round Jets J83-276
Penetration and Breakup of Slurry Jets in a Supersonic Stream J83-195
Three-Dimensional, Two-Phase Supersonic Nozzle Flows J83-128
Measurement of the Particle Size Distribution in a Pulsed Hypersonic Flow Facility J83-047

Nonsteady Aerodynamics

Transient Decay Times and Mean Values of Unsteady Oscillations in Transonic Flow J83-327

Laser Doppler Velocimeter Measurements in Unsteady, Separated, Transonic Diffuser Flows J83-314
Review of Support Interference in Dynamic Tests J83-309
Unsteadiness of the Separation Shock Wave Structure in a Supersonic Compression Ramp Flowfield J83-305
Comparison Between Navier-Stokes and Thin-Layer Computations for Separated Supersonic Flow J83-298
Characteristic Frequencies of Transonic Diffuser Flow Oscillations J83-232
An Aeroacoustic Model for High-Speed, Unsteady Blade-Vortex Interaction J83-231
Reynolds Stresses for Unsteady Turbulent Flows J83-227
Unsteady Transonic Small Disturbance Approximation with Strong Shock Waves J83-173
Computation of Nonequilibrium, Supersonic Three-Dimensional Inviscid Flow over Blunt-Nosed Bodies J83-158
Aerodynamic Theory for Wing with Side Edge Passing Subsonically through a Gust J83-155
Computations of Unsteady Transonic Cascade Flows J83-148
Oscillations of Impinging Shear Layers J83-126
Instantaneous Turbulence Profiles in the Wake of an Oscillating Airfoil J83-124
A Method of Predicting Unsteady Turbulent Flows and Its Application to Diffusers with Unsteady Inlet Conditions J83-106
Hydroelastic Effects of Separated Flow J83-083
Self-Excited Wave Oscillations in a Water Table J83-072
Unsteady Transonic Flow over Wings Including Inviscid/Viscous Interaction J83-071
An Unsteady Interactive Separation Process J83-070
Hot-Film Anemometer Measurements in a Starting Turbulent Jet J83-057
A Finite State Aerodynamic Model for a Lifting Surface in Incompressible Flow J83-033
Numerical Prediction of Dynamic Forces on Arbitrarily Pitched Airfoils J83-032
Nonlinear Aerodynamic Modeling of Flap Oscillations in Transonic Flow: A Numerical Validation J83-015
Linear/Nonlinear Behavior in Unsteady Transonic Aerodynamics J83-005
Karman Vortex Shedding and the Effect of Body Motion J80-177

Nozzle and Channel Flow

Laser Doppler Velocimeter Measurements in Unsteady, Separated, Transonic Diffuser Flows J83-314
The Response of Normal Shocks in Diffusers J83-256
Prediction of Curved Channel Flow with an Extended k-ϵ Model of Turbulence J83-254
Characteristic Frequencies of Transonic Diffuser Flow Oscillations J83-232
Calculation of Various Diffuser Flows with Inlet Swirl and Inlet Distortion Effects J83-213
Analysis of Viscous-Inviscid Interaction in Transonic Internal Flows J83-182
Edge Tones in High-Speed Flows and Their Application to Multiple-Jet Mixing J83-178
Simple and Accurate Calculation of Supersonic Nozzle Contour J83-144
Three-Dimensional, Two-Phase Supersonic Nozzle Flows J83-128
Wind Tunnel Noise Reduction at Mach 5 with a Rod-Wall Sound Shield J83-125
Influence of Finite Slot Size on Boundary Layer with Suction or Injection J83-122
A Method of Predicting Unsteady Turbulent Flows and Its Application to Diffusers with Unsteady Inlet Conditions J83-106
Computation of High Reynolds Number Internal/External Flows J83-034
The Flowfield in a Suddenly Enlarged Combustion Chamber J83-013
Shock-Fitting Bicharacteristic Algorithm for Three-Dimensional Scarfed Nozzle Flowfields J83-003
Inviscid Solution for the Secondary Flow in Curved Ducts J81-203

Plasmadynamics and MHD

Theoretical Study of Discharge Confinement in an Electron-Beam-Controlled Laser Discharge Cavity J83-287
Joule Heating Effects in MHD Generator Boundary Layers J83-129
Idealized Model for Plasma Acceleration in an MHD Channel J83-065
Phenomenological Model Describing Orificed, Hollow Cathode Operation J83-001

Radiatively Coupled Flows and Heat Transfer

Stagnation-Point Ablation of Carbonaceous Flat Disks--Part II: Experiment J83-322
Stagnation-Point Ablation of Carbonaceous Flat Disks--Part I: Theory J83-292

Rarefied Flows

Expansion of a Gas Cloud by the Discrete Velocity Method J83-303

Reactive Flows

Combustion in a Turbulent Mixing Layer Formed at a Rearward-Facing Step J83-289
Computation of Reacting Flowfield with Radiation Interaction in Chemical Lasers J83-239
Fluorescence Measurements of OH in a Turbulent Flame J83-209
Simple Model for Base Pressure Effects in Source Flow Chemical Lasers J83-208
Computation of Nonequilibrium, Supersonic Three-Dimensional Inviscid Flow over Blunt-Nosed Bodies J83-158
The Design and Combustion Performance of Practical Swirlers for Integral Rocket/Ramjets J83-137
Measurements of Reactive Recirculating Jet Mixing in a Combustor J83-050
Model for Pure Source Flow Chemical Lasers J83-048
Flowfield Experiments on a DF Chemical Laser J83-046
Turbulent Flow Analysis of Erosive Burning of Cylindrical Composite Solid Propellants J82-023

Shock Waves and Detonations

Stability of Shock Waves Attached to Wedge and Cones J83-302
Detonation Propulsion Experiments and Theory J83-261
Boundary-Layer and Turbulence Intensity Measurements in a Shock Wave/Boundary-Layer Interaction J83-250
Flame Velocity for the Onset of Detonation J83-211
Interaction of Oblique Shock and Detonation Waves J83-189
Vorticity at the Shock Foot in Inviscid Flow J83-171
Shock Reflection Transition in Three-Dimensional Steady Flow About Interfering Bodies J83-133
Freestream Tubulence and Transonic Flow over a "Bump" Model J83-086
Shock Tube Diagnostics Utilizing Laser Raman Scattering J83-012
Mechanism of Impact Pressure Generation from Spark-Generated Bubble Collapse Near a Wall J83-007
Propagation of Weak Discontinuity through the Unsteady Flow of Thermally Conducting Dissociating Gases J81-074

Subsonic Flow

Three-Dimensional Flowfield Inside a Low-Speed Axial Flow Compressor Rotor J83-312
Numerical Simulation of Flow Around a Three-Dimensional Turret J83-284
The Boundary Layer on an Axisymmetric Body With and Without Spin J83-277
A Low Mach Number Euler Formulation and Application to Time-Iterative LBI Schemes J83-268
Stagnation Point Heat Transfer for Jet Impingement to a Plane Surface J83-229
Time-Resolved Two-Dimensional Concentration Measurements in an Acoustically Driven Flow J83-206
Seven-Hole Cone Probes for High Angle Flow Measurement: Theory and Calibration J83-186
Mode Propagation in Nonuniform Circular Ducts with Potential Flow J83-183
Effects of Artificial Excitation upon a Low Reynolds Number Mach 2.5 Jet J83-174
Modification of Subsonic Wakes Using Boundary Layer and Base Mass Transfer J83-127
Mean Flowfields in Axisymmetric Combustor Geometries with Swirl J83-114
An Interaction Algorithm for Three-Dimensional Turbulent Subsonic Aerodynamic Juncture Region Flow J83-105
Freestream Turbulence Effects on Attached Subsonic Turbulent Boundary Layers J83-102
Riblets as a Viscous Drag Reduction Technique J83-099
Calculation of Symmetric Vortex Separation Affecting Subsonic Bodies at High Incidence J83-076
Aerosound from Corner Flow and Flap Flow J83-044
Effects of Mach Number on the Development of a Subsonic Rectangular Jet J83-036
Rayleigh Scattering Measurements of the Gas Concentration Field in Turbulent Jets J83-011
Correlation of the Detachment of Two-Dimensional Turbulent Boundary Layers J83-009
Streamwise Corner Flow with Wall Suction J83-004
Improved Method for the Measurement of Turbulence Quantities J82-027
Karman Vortex Shedding and the Effect of Body Motion J80-177

Supersonic and Hypersonic Flow

Axisymmetric Density Field Measurements by Moire Deflectometry J83-329
Expansion of a Gas Cloud by the Discrete Velocity Method J83-303
Stability of Shock Waves Attached to Wedge and Cones J83-302
Comparison Between Navier-Stokes and Thin-Layer Computations for Separated Supersonic Flow J83-298
Correlation of Hypersonic Stagnation Point Heat Transfer at Low Reynolds Numbers J83-295
Computation of the Asymmetric Vortex Pattern for Bodies of Revolution J83-279
The Two-Dimensional Laminar Wake with Initial Asymmetry J83-249
An Efficient, Full-Potential Implicit Method Based on Characteristics for Supersonic Flows J83-236
Simple Model for Base Pressure Effects in Source Flow Chemical Lasers J83-208
Interaction of Oblique Shock and Detonation Waves J83-189
Compressibility Effects in Turbulent Shear Layers J83-176
A Split-Coefficient/Locally Monotonic Scheme for Multishocked Supersonic Flow J83-163
Computation of Nonequilibrium, Supersonic Three-Dimensional Inviscid Flow over Blunt-Nosed Bodies J83-158
Simple and Accurate Calculation of Supersonic Nozzle Contour J83-144
Three-Dimensional, Two-Phase Supersonic Nozzle Flows J83-128
Wall Pressure Fluctuations in Attached Boundary-Layer Flow J83-101
Parameters for the Simulation of High Temperature Blown Shock Layers J83-060
A Comparative Study of Time-Marching and Space-Marching Numerical Methods J83-022
Upstream Influence in Sharp Fin-Induced Shock Wave Turbulent Boundary-Layer Interaction J83-021
Shock-Fitting Bicharacteristic Algorithm for Three-Dimensional Scarfed Nozzle Flowfields J83-003

Transonic Flow

Transient Decay Times and Mean Values of Unsteady Oscillations in Transonic Flow J83-327
Laser Doppler Velocimeter Measurements in Unsteady, Separated, Transonic Diffuser Flows J83-314
The Single-Cycle Scheme: A New Approach to Numerical Optimization J83-307
Implicit, Nonswitching, Vector-Oriented Algorithm for Steady Transonic Flow J83-296
Application of a Finite Element Algorithm to the Solution of Steady Transonic Euler Equations J83-282
Conservative Full-Potential Calculations for Axisymmetric, Transonic Flow J83-278
A Multigrid Strongly Implicit Procedure for Transonic Potential Flow Problems J83-275
Engine Power Simulation for Transonic Flow-Through Nacelles J83-270
An Implicit Lambda Scheme J83-257
Finite Volume Calculation of Three-Dimensional Potential Flow Around a Propeller J83-253
Boundary-Layer and Turbulence Intensity Measurements in a Shock Wave/Boundary-Layer Interaction J83-250
Design of Supercritical Cascades with High Solidity J83-240
A Grid Overlapping Scheme for Flowfield Computations About Multicomponent Configurations J83-237
An Efficient, Full-Potential Implicit Method Based on Characteristics for Supersonic Flows J83-236
Finite Element Methods for Transonic Flow Analysis J83-204
Three-Dimensional Flow Studies on a Slotted Transonic Wind Tunnel Wall J83-187
Analysis of Viscous-Inviscid Interaction in Transonic Internal Flows J83-182
Unsteady Transonic Small Disturbance Approximation with Strong Shock Waves J83-173
Vorticity at the Shock Foot in Inviscid Flow J83-171
Numerical Solution of Transonic Wing Flowfields J83-162
A More Accurate Transonic Computational Method for Wing-Body Configurations J83-160
Transonic Flow Calculations Using the Euler Equations J83-159
Separated Trailing-Edge Flow at a Transonic Mach Number J83-154
Computations of Unsteady Transonic Cascade Flows J83-148
A Fuzzy Algorithm to Compute Transonic Profile Flow J83-146
Freestream Tubulence and Transonic Flow over a "Bump" Model J83-086
Correlation of Preston Tube Data with Laminar Skin Friction J83-073
Unsteady Transonic Flow over Wings Including Inviscid/Viscous Interaction J83-071
A Finite Element Formulation for Steady Transonic Euler Equations J83-068
Numerical Solution of Transonic Stream Function Equation J83-066
Transonic Airfoil Calculations Using Solution-Adaptive Grids J83-055
Experimental Investigation of Turbulence Properties in Transonic Shock/Boundary-Layer Interactions J83-038
Nonlinear Aerodynamic Modeling of Flap Oscillations in Transonic Flow: A Numerical Validation J83-015
A Fast Algorithm for the Calculation of Transonic Flow over Wing/Body Combinations J83-008
Linear/Nonlinear Behavior in Unsteady Transonic Aerodynamics J83-005

Viscous Nonboundary-Layer Flows

Accuracy of Approximations to the Navier-Stokes Equations J83-325
Supersonic Flow over a Rearward Facing Step with Transverse Nonreacting Hydrogen Injection J83-316
A Composite Velocity Procedure for the Compressible Navier-Stokes Equations J83-286
Spin-Up from Rest in a Differentially Rotating Cylinder J83-238
Calculation of Various Diffuser Flows with Inlet Swirl and Inlet Distortion Effects J83-213
A Variation on MacCormack's Method for Axisymmetric Viscous Compressible Flows J83-194
Constraints on the Invariant Functions of Axisymmetric Turbulence J83-184
Turbulence Modeling for Computational Aerodynamics J83-180
Force and Moment in Incompressible Flows J83-169
Computed and Measured Turbulence in Axisymmetric Reciprocating Engines J83-115
Computation of High Reynolds Number Internal/External Flows J83-034

Wave Motion and Sloshing

Bow Wave Patterns J83-168

Interdisciplinary Topics

Aerospace Technology Utilization

The Life Cycle of a Tornadic Cloud as Seen From a Geosynchronous Satellite J83-230

Analytical and Numerical Methods

The Single-Cycle Scheme: A New Approach to Numerical Optimization J83-307
Numerical Solution of Natural Convection in Eccentric Annuli J83-246
Optimum Sensitivity Derivatives of Objective Functions in Nonlinear Programming J83-170
Some Analysis Methods for Rotating Systems with Periodic Coefficients J83-165
Extrapolation of Optimum Design Based on Sensitivity Derivatives J83-152
An Alternating Method for Analysis of Surface-Flawed Aircraft Structural Components J83-139
An Integral Method Theorem for Heat Conduction J83-119
Geometrically Nonlinear Transient Analysis of Laminated Composite Plates J83-118
Hydrodynamic Added-Mass Identification from Resonance Tests J83-116
Nonlinear Truncation Error Analysis of Finite Difference Schemes for the Euler Equations J83-100
A Three-Dimensional Modified Stongly Implicit Procedure for Heat Conduction J83-054
Nonlinear Aerodynamic Modeling of Flap Oscillations in Transonic Flow: A Numerical Validation J83-015
Potential of Transformation Methods in Optimal Design J81-263

Atmospheric and Space Sciences

Extrapolation of Space-Simulation Beam-Plasma Investigations to Shuttle-Borne Applications J83-311
Laboratory Simulations of Controlled Energetic Electron-Beam-Plasma Interactions in Space J83-255
The Life Cycle of a Tornadic Cloud as Seen From a Geosynchronous Satellite J83-230
Global Distribution of Stratospheric Aerosols by Satellite Measurements J83-121
Carbon Catalyzed SO_2 Oxidation by NO_2 J83-025

Computer Software

Potential of Transformation Methods in Optimal Design J81-263

Lasers and Laser Applications

Theoretical Study of Discharge Confinement in an Electron-Beam-Controlled Laser Discharge Cavity J83-287
Experimental Determination of Vapor Species from Laser-Ablated Carbon Phenolic Composites J83-225
Simple Model for Base Pressure Effects in Source Flow Chemical Lasers J83-208

Temperature Requirements and Corrosion Rates in Combustion Driven Hydrogen Fluoride Supersonic Diffusion Lasers J83-207
Time-Resolved Two-Dimensional Concentration Measurements in an Acoustically Driven Flow J83-206
Spectral Analysis Algorithms for the Laser Velocimeter: A Comparative Study J83-134
Thermal Homogeneity in a Closed Excimer Laser Cavity J83-107
Pressure Wave Attenuation Due to Anode Mufflers in Pulsed Lasers J83-074
Minimum Angular Vibration Design of Airborne Electro-Optical Packages J83-051
Model for Pure Source Flow Chemical Lasers J83-048
Measurement of the Particle Size Distribution in a Pulsed Hypersonic Flow Facility J83-047
Flowfield Experiments on a DF Chemical Laser J83-046
The Flowfield in a Suddenly Enlarged Combustion Chamber J83-013
Shock Tube Diagnostics Utilizing Laser Raman Scattering J83-012
Rayleigh Scattering Measurements of the Gas Concentration Field in Turbulent Jets J83-011

Numerical Analysis

Computation of the Asymmetric Vortex Pattern for Bodies of Revolution J83-279
Optimization of Openings in Plates under Plane Stress J83-264
Time Integration of the Equations of Motion of a Structural System Including Damping J83-242
Applications of Exponential Splines in Computational Fluid Dynamics J83-202
A Variation on MacCormack's Method for Axisymmetric Viscous Compressible Flows J83-194
Optimum Sensitivity Derivatives of Objective Functions in Nonlinear Programming J83-170
Pseudo-Updated Constrained Solution Algorithm for Nonlinear Heat Conduction J83-167
A Finite Element Algorithm for Computational Fluid Dynamics J83-156
Nonlinear Truncation Error Analysis of Finite Difference Schemes for the Euler Equations J83-100
Numerical Evaluation of Principal Value Integral by Gauss-Laguerre Quadrature J83-024
Finite Elements for Initial Value Problems in Dynamics J81-258

Research Facilities and Instrumentation

Axisymmetric Density Field Measurements by Moire Deflectometry J83-329
Extrapolation of Space-Simulation Beam-Plasma Investigations to Shuttle-Borne Applications J83-311
Wind Tunnel Wall Corrections Deduced by Iterating from Measured Wall Static Pressure J83-310
Seven-Hole Cone Probes for High Angle Flow Measurement: Theory and Calibration J83-186
Application of a Three-Sensor Hot-Wire Probe for Incompressible Flow J83-136
Flow Visualization Methods for Separated Three-Dimensional Shock Wave/Turbulent Boundary-Layer Interactions J83-075
Correlation of Preston Tube Data with Laminar Skin Friction J83-073
Shock Tube Diagnostics Utilizing Laser Raman Scattering J83-012

Sensor Systems

The Life Cycle of a Tornadic Cloud as Seen From a Geosynchronous Satellite J83-230
Application of a Three-Sensor Hot-Wire Probe for Incompressible Flow J83-136
Global Distribution of Stratospheric Aerosols by Satellite Measurements J83-121

System Identification

Improvement of a Large Analytical Model Using Test Data J83-220

Launch Vehicle and Missile (LV/M) Technology

Aerodynamics

A Split-Coefficient/Locally Monotonic Scheme for Multishocked Supersonic Flow J83-163
Calculation of Symmetric Vortex Separation Affecting Subsonic Bodies at High Incidence J83-076

Propulsion and Propellant Systems

Atomization of Imping Liquid Jets in a Supersonic Crossflow J83-037

Testing, Flight and Ground

Single- and Multiple-Crater Induced Nosetip Transition J83-179

Vibration

Free Vibrations of Simply Supported Cylindrical Shells of Oval Cross Section J83-191

Marine Technology

Hydrodynamics, Vessel and Control Surface

Numerical Evaluation of Principal Value Integral by Gauss-Laguerre Quadrature J83-024

Materials, Corrosion/Erosion

Mechanism of Impact Pressure Generation from Spark-Generated Bubble Collapse Near a Wall J83-007

Propulsion

A Simple Model for Elastic Two-Dimensional Sails J83-026

Vessel Vibration

Free Vibrations of Simply Supported Cylindrical Shells of Oval Cross Section J83-191

Propulsion

Airbreathing Propulsion

Inlet Flow Distortion in Turbomachinery: Comparison of Theory and Experiment in a Transonic Fan Stage J83-330
Visualization of Flow Patterns Induced by an Impinging Jet Issuing from a Circular Planform J83-328
Supersonic Flow over a Rearward Facing Step with Transverse Nonreacting Hydrogen Injection J83-316
Three-Dimensional Flowfield Inside a Low-Speed Axial Flow Compressor Rotor J83-312
Application of a Finite Element Algorithm to the Solution of Steady Transonic Euler Equations J83-282
Engine Power Simulation for Transonic Flow-Through Nacelles J83-270

Application of a Three-Sensor Hot-Wire Probe for Incompressible Flow J83-136
Mean Flowfields in Axisymmetric Combustor Geometries with Swirl J83-114
Shock Waves Ahead of a Fan with Nonuniform Blades J83-111
Experimental Study of Jet Mixing Mechanisms in a Model Secondary Combustor J83-110
Blade Loading and Rotation Effects on Compressor Rotor Wake Near End Walls J83-077
Atomization of Imping Liquid Jets in a Supersonic Crossflow J83-037
Sound Propagation in Multistage Axial Turbomachines J83-014

Combustion and Combustor Designs

Linearized Unsteady Flame Surface Approximation Result in Complex Notation J83-331
Turbulence Measurements in Confined Jets Using a Rotating Single-Wire Probe Technique J83-301
Combustion in a Turbulent Mixing Layer Formed at a Rearward-Facing Step J83-289
Nonsteady Flame Spreading in Two-Dimensional Ducts J83-288
Steady-State Evaporation Characteristics of Hydrocarbon Fuel Drops J83-263
Dynamic Behavior of a Bluff-Body Diffusion Flame J83-260
Influence of Atomizer Design Features on Mean Drop Size J83-215
Acoustic Signature from Flames as a Combustion Diagnostic Tool J83-210
The Design and Combustion Performance of Practical Swirlers for Integral Rocket/Ramjets J83-137

A Pocket Model for Aluminum Agglomeration in Composite Propellants J83-135
Computed and Measured Turbulence in Axisymmetric Reciprocating Engines J83-115
Using A Global Hydrogen-Air Combustion Model in Turbulent Reacting Flow Calculations J83-113
Liftoff Characteristics of Turbulent Jet Diffusion Flames J83-079
Measurements of Reactive Recirculating Jet Mixing in a Combustor J83-050
The Flowfield in a Suddenly Enlarged Combustion Chamber J83-013
Theoretical Prediction of Erosive Burning Characteristics of Solid Rocket Propellant J77-002

Combustion Stability, Ignition, and Detonation

Linearized Unsteady Flame Surface Approximation Result in Complex Notation J83-331
Nonsteady Flame Spreading in Two-Dimensional Ducts J83-288
Stagnation Point Heat Transfer for Jet Impingement to a Plane Surface J83-229
Incomplete Combustion: A Possible Cause of Combustion Instability J83-212
Ignition Dynamics of Fully Reactive Propellant in Stagnation Flow J83-112
A Numerical Study of Nonlinear Instability Phenomena in Solid Rocket Motors J83-109
Numerical Studies of Laminar Flame Propagation in Spherical Bombs J83-078
Application of the Finite-Element Method to One-Dimensional Flame Propagation Problems J83-049

Electric and Advanced Space Propulsion

Detonation Propulsion Experiments and Theory J83-261
Idealized Model for Plasma Acceleration in an MHD Channel J83-065
Phenomenological Model Describing Orificed, Hollow Cathode Operation J83-001

Environmental Effects

Conventional Profile Coaxial Jet Noise Prediction J83-067

Fuels and Propellants, Properties of

Erosive Burning J83-313
Steady-State Evaporation Characteristics of Hydrocarbon Fuel Drops J83-263
Catalyzed and Inhibited Decomposition of Ammonium Perchlorate J83-251
Influence of Atomizer Design Features on Mean Drop Size J83-215
Boron Particle Ignition in a Restricted Thermodynamical Equilibrium J83-188
Effects of Properties and Location in the Plume on Droplet Diameter for Injection in a Supersonic Stream J83-181
A Pocket Model for Aluminum Agglomeration in Composite Propellants J83-135
Theoretical Prediction of Erosive Burning Characteristics of Solid Rocket Propellant J77-002

Propulsion for Marine Application

Thrust Augmenting Ejectors, Part II J83-315

Solid and Hybrid Rocket Engines

Incomplete Combustion: A Possible Cause of Combustion Instability J83-212
Effect of Nonlinear Characteristics on Temperature Distribution in a Rocket Grain J83-200
Boron Particle Ignition in a Restricted Thermodynamical Equilibrium J83-188
A Pocket Model for Aluminum Agglomeration in Composite Propellants J83-135
A Numerical Study of Nonlinear Instability Phenomena in Solid Rocket Motors J83-109
Turbulent Flow Analysis of Erosive Burning of Cylindrical Composite Solid Propellants J82-023
Theoretical Prediction of Erosive Burning Characteristics of Solid Rocket Propellant J77-002

Spacecraft Technology

Entry Vehicle Aerodynamic Heating

Stagnation-Point Ablation of Carbonaceous Flat Disks--Part II: Experiment J83-322
Correlation of Hypersonic Stagnation Point Heat Transfer at Low Reynolds Numbers J83-295
Stagnation-Point Ablation of Carbonaceous Flat Disks--Part I: Theory J83-292
A Review of Roughness-Induced Nosetip Transition J83-002

Entry Vehicle Aerodynamics

A Finite-Volume, Adaptive Grid Algorithm Applied to Planetary Entry Flowfields J83-234

Entry Vehicle Structural Design

The Fracture Diagram: A New Design Tool for Stiffened Panels J83-241
Rain-Induced Vibration J83-084

Entry Vehicle Testing, Flight and Ground

A Review of Roughness-Induced Nosetip Transition J83-002

Simulation

Measurement of the Particle Size Distribution in a Pulsed Hypersonic Flow Facility J83-047

Space Station Systems, Manned

Extrapolation of Space-Simulation Beam-Plasma Investigations to Shuttle-Borne Applications J83-311

Systems

Global Distribution of Stratospheric Aerosols by Satellite Measurements J83-121

Structural Mechanics and Materials

Aeroelasticity and Hydroelasticity

Unified Aeroelastic Flutter Theory for Very Low Aspect Ratio Panels J83-291
Nonlinear Panel Flutter Using High-Order Triangular Finite Elements J83-266
Minimum-Weight Design of an Orthotropic Shear Panel with Fixed Flutter Speed J83-190
Unified Panel Flutter Theory with Viscous Damping Effects J83-141
Hydroelastic Effects of Separated Flow J83-083
Flutter of Orthotropic Panels in Supersonic Flow Using Affine Transformations J83-052

Materials, Properties of

Nonlinear Stress-Strain and Strength Response of Axisymmetric Bimodulus Composite Material Shells J83-321
Mechanical Properties of a Fiberglass Prepreg System at Cryogenic and Other Temperatures J83-318
An Inelastic Finite Element Model of 4D Carbon-Carbon Composites J83-216
Fractional Calculus--A Different Approach to the Analysis of Viscoelastically Damped Structures J83-138
Evaluation of Creep Crack Growth Criteria for IN-100 at Elevated Temperature J83-081

Structural Composite Materials

Nonlinear Stress-Strain and Strength Response of Axisymmetric Bimodulus Composite Material Shells J83-321
Postbuckling of Orthotropic Composite Plates Loaded in Compression J83-319
Mechanical Properties of a Fiberglass Prepreg System at Cryogenic and Other Temperatures J83-318
One-Dimensional Micromechanical Analysis of Woven Fabric Composites J83-317
Low-Velocity Impact Response of Laminated Plates J83-265
Optimization of Openings in Plates under Plane Stress J83-264
Generic Buckling Curves for Specially Orthotropic Rectangular Plates J83-217
An Inelastic Finite Element Model of 4D Carbon-Carbon Composites J83-216
Transverse Vibrations of Nonuniform Rectangular Orthotropic Plates J83-198
Smooth Contact Between a Rigid Indenter and an Initially Stressed Orthotropic Beam J83-193
Extrapolation of Optimum Design Based on Sensitivity Derivatives J83-152
Optimally Discretized Finite Elements for Boundary-Layer Stresses in Composite Laminates J83-117 J83-094
Equivalent G/E of Helicopter Rotor Blades J83-093
Optimal Laminated Composite Shells for Buckling and Vibration J83-080

Structural Design

Buckling of Thin Plates Using the Collocation Least-Square Method J83-332
Approximations Method for Space Frame Synthesis J83-290
Damage Tolerant Design Using Collapse Techniques J83-267
Optimization of Openings in Plates under Plane Stress J83-264
Nonlinear Inverse Perturbation Method in Dynamic Analysis J83-243
Buckling of Sinusoidally Corrugated Plates under Axial Compression J83-228
Nonlinear Analysis of Optimized Structure with Constraints on System Stability J83-222
Effect of Static Preloading on a Dynamic Stability of Structures J83-221
Analysis of a Thin-Walled Pressurized Torus in Contact with a Plane J83-219
Postbuckling Behavior of a Thick Plate J83-218
Transverse Vibrations of Nonuniform Rectangular Orthotropic Plates J83-198

Smooth Contact Between a Rigid Indenter and an Initially Stressed Orthotropic Beam J83-193
Stress Constraints and Screening for Optimality Criteria Design J83-192
Optimum Sensitivity Derivatives of Objective Functions in Nonlinear Programming J83-170
Extrapolation of Optimum Design Based on Sensitivity Derivatives J83-152
Optimally Discretized Finite Elements for Boundary-Layer Stresses in Composite Laminates J83-117
Optimal Laminated Composite Shells for Buckling and Vibration J83-080
Minimum Angular Vibration Design of Airborne Electro-Optical Packages J83-051
Comparison of Elasticity, Shell Core, and Sandwich Shell Theories J83-016
Potential of Transformation Methods in Optimal Design J81-263

Structural Durability (including Fatigue and Fracture)

The Fracture Diagram: A New Design Tool for Stiffened Panels J83-241
An Alternating Method for Analysis of Surface-Flawed Aircraft Structural Components J83-139
Evaluation of Creep Crack Growth Criteria for IN-100 at Elevated Temperature J83-081

Structural Dynamics

Large-Amplitude Vibrations of Geometrically Imperfect Shallow Spherical Shells with Structural Damping J83-320
Integrated Thermal-Structural Approach for Shells of Revolution J83-272
Vibration of Triangular Plates J83-271
Low-Velocity Impact Response of Laminated Plates J83-265
Large-Amplitude Vibration of an Initially Stressed Thick Circular Plate J83-244
Nonlinear Inverse Perturbation Method in Dynamic Analysis J83-243
Time Integration of the Equations of Motion of a Structural System Including Damping J83-242
The Dynamic Collapse of a Column Impacting a Rigid Surface J83-223
Effect of Static Preloading on a Dynamic Stability of Structures J83-221
Improvement of a Large Analytical Model Using Test Data J83-220
Blade Loss Transient Dynamic Analysis of Turbomachinery J83-214
Free Vibrations of Simply Supported Cylindrical Shells of Oval Cross Section J83-191
Minimum-Weight Design of an Orthotropic Shear Panel with Fixed Flutter Speed J83-190
Dynamic Modeling of Structures from Measured Complex Modes J83-166
Some Analysis Methods for Rotating Systems with Periodic Coefficients J83-165
Orthogonal Polynomials as Variable-Order Finite Element Shape Functions J83-151
Finite Element Modeling Techniques for Constrained Layer Damping J83-149
Buckled Plate Vibrations and Large Amplitude Vibrations Using High-Order Triangular Elements J83-140
Fractional Calculus--A Different Approach to the Analysis of Viscoelastically Damped Structures J83-138 J83-094
Dynamic Stability Boundaries for a Sinusoidal Shallow Arch under Pulse Loads J83-087
Rain-Induced Vibration J83-084
Hydroelastic Effects of Separated Flow J83-083
Computation of Normal Modes from Identified Complex Modes J83-082
Vibrations of Nonuniform Beams with One End Elastically Restrained against Rotation J83-059
Minimum Angular Vibration Design of Airborne Electro-Optical Packages J83-051
Finite Elements for Initial Value Problems in Dynamics J81-258

Structural Stability

Buckling of Thin Plates Using the Collocation Least-Square Method J83-332
Postbuckling of Orthotropic Composite Plates Loaded in Compression J83-319
Inelastic Buckling of Cylindrical Shells Subjected to Axial Tension and External Pressure J83-273
Integrated Thermal-Structural Approach for Shells of Revolution J83-272
Buckling of Sinusoidally Corrugated Plates under Axial Compression J83-228
Nonlinear Analysis of Optimized Structure with Constraints on System Stability J83-222
Effect of Static Preloading on a Dynamic Stability of Structures J83-221
Postbuckling Behavior of a Thick Plate J83-218
Generic Buckling Curves for Specially Orthotropic Rectangular Plates J83-217
Stability of Short Beck and Leipholz Columns on Elastic Foundation J83-199
Orthogonal Polynomials as Variable-Order Finite Element Shape Functions J83-151
Buckling of Very Thin, Nearly Perfect Axially Loaded Circular Cylindrical Shells J83-150
Buckled Plate Vibrations and Large Amplitude Vibrations Using High-Order Triangular Elements J83-140
Dynamic Stability Boundaries for a Sinusoidal Shallow Arch under Pulse Loads J83-087
Optimal Laminated Composite Shells for Buckling and Vibration J83-080

Structural Statics

Approximations Method for Space Frame Synthesis J83-290
Buckling of Sinusoidally Corrugated Plates under Axial Compression J83-228
Smooth Contact Between a Rigid Indenter and an Initially Stressed Orthotropic Beam J83-193
Stress Constraints and Screening for Optimality Criteria Design J83-192
Orthogonal Polynomials as Variable-Order Finite Element Shape Functions J83-151
Buckled Plate Vibrations and Large Amplitude Vibrations Using High-Order Triangular Elements J83-140
Optimally Discretized Finite Elements for Boundary-Layer Stresses in Composite Laminates J83-117
Comparison of Elasticity, Shell Core, and Sandwich Shell Theories J83-016

Thermal Stresses

Integrated Thermal-Structural Approach for Shells of Revolution J83-272
Effect of Nonlinear Characteristics on Temperature Distribution in a Rocket Grain J83-200

Thermophysics and Thermochemistry

Ablation, Pyrolysis, Thermal Decomposition and Degradation (including Refractories)

Stagnation-Point Ablation of Carbonaceous Flat Disks--Part II: Experiment J83-322
Stagnation-Point Ablation of Carbonaceous Flat Disks--Part I: Theory J83-292
Nonequilibrium Radiative Heating of an Ablating Jovian Entry Probe J83-247
Experimental Determination of Vapor Species from Laser-Ablated Carbon Phenolic Composites J83-225
Application of Solid-Phase Transition Kinetics to the Properties of HMX J83-058

Experimental Methods of Diagnostics

Dynamic Behavior of a Bluff-Body Diffusion Flame J83-260
Experimental Determination of Vapor Species from Laser-Ablated Carbon Phenolic Composites J83-225
Fluorescence Measurements of OH in a Turbulent Flame J83-209
Measurements of Reactive Recirculating Jet Mixing in a Combustor J83-050

Heat Conduction

Prediction of Interfacial Filler Thickness for Minimum Thermal Contact Resistance J83-245
Effect of Nonlinear Characteristics on Temperature Distribution in a Rocket Grain J83-200
Pseudo-Updated Constrained Solution Algorithm for Nonlinear Heat Conduction J83-167
An Integral Method Theorem for Heat Conduction J83-119
Application of Variational Embedding Technique to Nonlinear Heat Transfer Problems J83-088
A Tnree-Dimensional Modified Stongly Implicit Procedure for Heat Conduction J83-054
Improved Formulations for the Analysis of Convecting and Radiating Finned Surfaces J83-017

Radiation and Radiative Heat Transfer

Nonequilibrium Radiative Heating of an Ablating Jovian Entry Probe J83-247
P-N Approximation for Radiative Heat Transfer in a Nongray Medium J83-224
Application of Variational Embedding Technique to Nonlinear Heat Transfer Problems J83-088
Parameters for the Simulation of High Temperature Blown Shock Layers J83-060
A Comparative Study of Time-Marching and Space-Marching Numerical Methods J83-022
Radiative Transfer in Spectrally Dissimilar Absorbing-Emitting-Scattering Adjacent Mediums J83-019
Polarization and Surface Roughness Effects on Equilibrium Temperature for Interacting Surfaces J83-018
Improved Formulations for the Analysis of Convecting and Radiating Finned Surfaces J83-017

Radiatively Coupled Flows and Heat Transfer

Nonequilibrium Radiative Heating of an Ablating Jovian Entry Probe J83-247

Thermal Control

Prediction of Interfacial Filler Thickness for Minimum Thermal Contact Resistance J83-245

Polarization and Surface Roughness Effects on Equilibrium Temperature for Interacting Surfaces J83-018

Thermal Modeling and Analysis

Numerical Solution of Natural Convection in Eccentric Annuli J83-246

P-N Approximation for Radiative Heat Transfer in a Nongray Medium J83-224

Pseudo-Updated Constrained Solution Algorithm for Nonlinear Heat Conduction J83-167

Performance of a Cylindrical Phase-Change Thermal Energy Storage Unit J83-142

Thermal Homogeneity in a Closed Excimer Laser Cavity J83-107

Evaluation of Total Body Heat Transfer in Hypersonic Flow J83-089

Application of Variational Embedding Technique to Nonlinear Heat Transfer Problems J83-088

A Three-Dimensional Modified Stongly Implicit Procedure for Heat Conduction J83-054

Polarization and Surface Roughness Effects on Equilibrium Temperature for Interacting Surfaces J83-018

Thermochemistry and Chemical Kinetics

Conductivity Measurements of Phosphorus-Doped Potassium-Seeded MHD Plasmas J83-308

Incomplete Combustion: A Possible Cause of Combustion Instability J83-212

Temperature Requirements and Corrosion Rates in Combustion Driven Hydrogen Fluoride Supersonic Diffusion Lasers J83-207

Using A Global Hydrogen-Air Combustion Model in Turbulent Reacting Flow Calculations J83-113

Application of Solid-Phase Transition Kinetics to the Properties of HMX J83-058

Model for Pure Source Flow Chemical Lasers J83-048

Thermophysical Properties of Matter

Temperature Requirements and Corrosion Rates in Combustion Driven Hydrogen Fluoride Supersonic Diffusion Lasers J83-207

Performance of a Cylindrical Phase-Change Thermal Energy Storage Unit J83-142

Application of Solid-Phase Transition Kinetics to the Properties of HMX J83-058

Chronological Index

J77-002 Theoretical Prediction of Erosive Burning Characteristics of Solid Rocket Propellant. B. Jojic and Dj Blagojevie, *ARAK Jet Propulsion Laboratory (Yugoslavia)* (AIAAJ **15**, 4, p. 461) Article based on AIAA Paper 76-697
Technical Comment by Shou-fan Wang, *Beijing Institute of Technology* (AIAAJ **21**, 5, p. 800)

J80-177 Karman Vortex Shedding and the Effect of Body Motion. L. E. Ericsson, *Lockheed Missiles & Space Company, Inc.* (AIAAJ **18**, 8, p. 935) Article based on AIAA Paper 79-1531
Errata (AIAAJ **21**, 3, p. 480)

J80-270 Approximate Calculation of Vortex Trajectories of Slender Bodies at Incidence. D. Weihs, *Technion-Israel Institute of Technology* (AIAAJ **18**, 11, p. 1402) Technical Note
Technical Comment by William L. Oberkampf, *Sandia National Laboratories* (AIAAJ **21**, 2, p. 317)
Reply (AIAAJ **21**, 2, p. 318)

J81-074 Propagation of Weak Discontinuity through the Unsteady Flow of Thermally Conducting Dissociating Gases. B. G. Verma and A. Kumar, *Gorakhpur University* (AIAAJ **19**, 3, p. 398) Technical Note
Technical Comment by V. V. Menon and V. D. Sharma, *Banaras Hindu University* (AIAAJ **21**, 10, p. 1479)

J81-203 Inviscid Solution for the Secondary Flow in Curved Ducts. S. Abdallah and A. Hamed, *University of Cincinnati* (AIAAJ **19**, 8, p. 993) Article based on AIAA Paper 80-1116
Technical Comment by Nelson H. Kemp, *Physical Sciences Inc.* (AIAAJ **21**, 3, p. 476)

J81-258 Finite Elements for Initial Value Problems in Dynamics. T. E. Simkins, *U. S. Army Armament Research and Development Command,* (AIAAJ **19**, 10, p. 1357) Article
Technical Comment by Cecil D. Bailey, *The Ohio State University* (AIAAJ **21**, 1, p. 159)
Technical Comment by R. Riff, T. Weller and M. Baruch, *Technion-Israel Institute of Technology* (AIAAJ **21**, 2, p. 318)
Reply (AIAAJ **21**, 2, p. 319)

J81-263 Potential of Transformation Methods in Optimal Design. Ashok D. Belegundu and Jasbir S. Arora, *The University of Iowa* (AIAAJ **19**, 10, p. 1372) Technical Note
Errata (AIAAJ **21**, 3, p. 480)

J82-023 Turbulent Flow Analysis of Erosive Burning of Cylindrical Composite Solid Propellants. M. K. Razdan and K. K. Kuo, *The Pennsylvania State University* (AIAAJ **20**, 1, p. 122) Article based on AIAA Paper 80-1209
Technical Comment by Robert L. Glick, *Purdue University* (AIAAJ **21**, 1, p. 156)
Reply (AIAAJ **21**, 1, p. 157)
Technical Comment by Merrill K. King, *Atlantic Research Corporation* (AIAAJ **21**, 1, p. 157)
Reply (AIAAJ **21**, 1, p. 158)

J82-027 Improved Method for the Measurement of Turbulence Quantities. S. Sampath, V. Ganesan and B. H. L. Gowda, *Indian Institute of Technology* (AIAAJ **20**, 1, p. 148) Technical Note
Technical Comment by M. K. Swaminathan, G. W. Rankin and K. Sridhar, *University of Windsor (Canada)* (AIAAJ **21**, 3, p. 476)
Reply (AIAAJ **21**, 3, p. 476)

J83-001 Phenomenological Model Describing Orificed, Hollow Cathode Operation. Daniel E. Siegfried and Paul J. Wilbur, *Colorado State University* (AIAAJ **21**, 1, p. 3) Synoptic based on AIAA Paper 81-0746

J83-002 A Review of Roughness-Induced Nosetip Transition. R. G. Batt, *TRW STG*; and H. H. Legner, *Physical Sciences, Inc.* (AIAAJ **21**, 1, p. 7) Survey Paper based on AIAA Paper 81-1223

J83-003 Shock-Fitting Bicharacteristic Algorithm for Three-Dimensional Scarfed Nozzle Flowfields. Joseph Vadyak and Joe D. Hoffman, *Purdue University* (AIAAJ **21**, 1, p. 23) Article based on AIAA Paper 81-0258

J83-004 Streamwise Corner Flow with Wall Suction. W. H. Barclay, *University College London (England)*; and H. A. El-Gamal, *University of Alexandria (Egypt)* (AIAAJ **21**, 1, p. 31) Article

J83-005 Linear/Nonlinear Behavior in Unsteady Transonic Aerodynamics. Earl H. Dowell, *Princeton University*; Samuel R. Bland, *NASA Langley Research Center*; and Marc H. Williams, *Princeton University* (AIAAJ **21**, 1, p. 38) Article based on AIAA Paper 81-0643 CP812

J83-006 The Use of an Error Index to Improve Numerical Solutions for Unsteady Lifting Airfoils. Shigenori Ando and Akio Ichikawa, *Nagoya University (Japan)* (AIAAJ **21**, 1, p. 47) Article

J83-007 Mechanism of Impact Pressure Generation from Spark-Generated Bubble Collapse Near a Wall. A. Shima, K. Takayama and Y. Tomita, *Tonhoku University (Japan)*; and N. Ohsawa, *Toshiba Engineering Company (Japan)* (AIAAJ **21**, 1, p. 55) Article

J83-008 A Fast Algorithm for the Calculation of Transonic Flow over Wing/Body Combinations. T. J. Baker and C. R. Forsey, *Aircraft Research Association Limited (England)* (AIAAJ **21**, 1, p. 60) Article based on AIAA Paper 81-1015 CP814

J83-009 Correlation of the Detachment of Two-Dimensional Turbulent Boundary Layers. S. J. Kline, J. G. Bardina and R. C. Strawn, *Stanford University* (AIAAJ **21**, 1, p. 68) Article based on AIAA Paper 81-1220

J83-010 Modal Power Distribution in Ducts at High Frequencies. S. M. Baxter and C. L. Morfey, *University of Southampton (England)* (AIAAJ **21**, 1, p. 74) Article based on AIAA Paper 81-2013

J83-011 Rayleigh Scattering Measurements of the Gas Concentration Field in Turbulent Jets. Escoda,M. Carla and Marshall B. Long, *Yale University* (AIAAJ **21**, 1, p. 81) Article

J83-012 Shock Tube Diagnostics Utilizing Laser Raman Scattering. Joseph G. W. Glaser and Samuel Lederman, *Polytechnic Institute of New York* (AIAAJ **21**, 1, p. 85) Article

J83-013 The Flowfield in a Suddenly Enlarged Combustion Chamber. B. T. Yang and M. H. Yu, *National Tsing-Hua University (China)* (AIAAJ **21**, 1, p. 92) Article

J83-014 Sound Propagation in Multistage Axial Turbomachines. K. E. Heinig, *Motoren-und Turbinen-Union Munchen GmbH, (Germany)* (AIAAJ **21**, 1, p. 98) Article based on AIAA Paper 81-2047

J83-015 Nonlinear Aerodynamic Modeling of Flap Oscillations in Transonic Flow: A Numerical Validation. Chyu. W. J. and L. B. Schiff, *NASA Ames Research Center* (AIAAJ **21**, 1, p. 106) Article based on AIAA Paper 81-0073

J83-016 Comparison of Elasticity, Shell Core, and Sandwich Shell Theories. K. Chandrashekhara and A. Bhimaraddi, *Indian Institute of Science* (AIAAJ **21**, 1, p. 114) Article

J83-017 Improved Formulations for the Analysis of Convecting and Radiating Finned Surfaces. M. Manzoor, D. B. Ingham and P. J. Heggs, *University of Leeds (England)* (AIAAJ **21**, 1, p. 120) Article

J83-018 Polarization and Surface Roughness Effects on Equilibrium Temperature for Interacting Surfaces. T. F. Smith, T. K. Kim and P. Hix, *University of Iowa* (AIAAJ **21**, 1, p. 127) Article

J83-019 Radiative Transfer in Spectrally Dissimilar Absorbing-Emitting-Scattering Adjacent Mediums. K. H. Im and R. K. Ahluwalia, *Argonne National Laboratory* (AIAAJ **21**, 1, p. 134) Article based on AIAA Paper 81-1091

J83-020 A Model for the Backflow Mean Velocity Profile. Roger L. Simpson, *Southern Methodist University* (AIAAJ **21**, 1, p. 142) Technical Note

J83-021 Upstream Influence in Sharp Fin-Induced Shock Wave Turbulent Boundary-Layer Interaction. D. S. Dolling and S. M. Bogdonoff, *Princeton University* (AIAAJ **21**, 1, p. 143) Technical Note

J83-022 A Comparative Study of Time-Marching and Space-Marching Numerical Methods. R. N. Gupta, J. N. Moss and A. L. Simmonds, *NASA Langley Research Center* (AIAAJ **21**, 1, p. 145) Technical Note

J83-023 Length and Time Scales Relevant to Sound Generation in Excited Jets. W. G. Richarz, *University of Toronto* (AIAAJ **21**, 1, p. 148) Technical Note

J83-024 Numerical Evaluation of Principal Value Integral by Gauss-Laguerre Quadrature. Hideichi Endo, *Hitachi Zosen Corporation (Japan)* (AIAAJ **21**, 1, p. 149) Technical Note
Technical Comment by William Squire, *West Virginia University* (AIAA J **21**, 11, p. 1607)
Reply (AIAAJ **21**, 11, p. 1607)

J83-025 Carbon Catalyzed SO_2 Oxidation by NO_2. W. R. Cofer III, D. R. Schryer and R. S. Rogowski, *NASA Langley Research Center* (AIAAJ **21**, 1, p. 151) Technical Note based on AIAA Paper 82-0089

J83-026 A Simple Model for Elastic Two-Dimensional Sails. P. S. Jackson, *Auckland University (New Zealand)* (AIAAJ **21**, 1, p. 153) Technical Note

J83-032 Numerical Prediction of Dynamic Forces on Arbitrarily Pitched Airfoils. Harwood A. Hegna, *U. S. Air Force Academy* (AIAAJ **21**, 2, p. 161) Synoptic based on AIAA Paper 82-0092

J83-033 A Finite State Aerodynamic Model for a Lifting Surface in Incompressible Flow. Yoshikazu Miyazawa, *National Aerospace Laboratory (Japan)*; and Kyuichiro Washizu, *Osaka University (Japan)* (AIAAJ **21**, 2, p. 163) Article

J83-034 Computation of High Reynolds Number Internal/External Flows. Michael C. Cline, *Los Alamos National Laboratory*; and Richard G. Wilmoth, *NASA Langley Research Center* (AIAAJ **21**, 2, p. 172) Synoptic based on AIAA Paper 81-1194

J83-035 Computer-Enhanced Analysis of a Jet in a Cross Stream. John W. Trischka, *Syracuse University*; and Nancy J. Birkenheuer, *National Center for Atmospheric Research* (AIAAJ **21**, 2, p. 174) Synoptic

J83-036 Effects of Mach Number on the Development of a Subsonic Rectangular Jet. Y. Hsia, A. Krothapalli, D. Baganoff and K. Karamcheti, *Joint Institute of Aeronautics and Acoustics, Stanford University* (AIAAJ **21**, 2, p. 176) Synoptic based on AIAA Paper 82-0219

J83-037 Atomization of Imping Liquid Jets in a Supersonic Crossflow. Patrick Hewitt and Joseph A. Schetz, *Virginia Polytechnic Institute and State University* (AIAAJ **21**, 2, p. 178) Synoptic

J83-038 Experimental Investigation of Turbulence Properties in Transonic Shock/Boundary-Layer Interactions. Jean M. Delery, *Office National d'Etudes et de Recherches Aerospatiales* (AIAAJ **21**, 2, p. 180) Article based on AIAA Paper 81-1245

J83-039 Theoretical and Experimental Evaluation of Transmission Loss of Cylinders. Yiren S. Wang, Malcolm J. Crocker and P. K. Raju, *Purdue University* (AIAAJ **21**, 2, p. 186) Article based on AIAA Paper 81-1971

J83-040 Acoustics in Variable Area Duct:Finite Element and Finite Differer.ce Comparisons to Experiment. Kenneth J. Baumeister, *NASA Lewis Research Center*; W. Eversman and R. J. Astley, *University of Missouri*; and J. W. White, *University of Tennessee* (AIAAJ **21**, 2, p. 193) Article based on AIAA Paper 81-2016

J83-041 Eigensolutions for Liners in Uniform Mean Flow Ducts. W. Koch, *DFVLR/AVA (West Germany)*; and W. Mohring, *Max-Planck-Institut fur Stromungsforschung (West Germany)* (AIAAJ **21**, 2, p. 200) Article based on AIAA Paper 81-2017

J83-042 Effect of Excitation on Coaxial Jet Noise. H. Y. Lu, *Boeing Commercial Airplane Company* (AIAAJ **21**, 2, p. 214) Article based on AIAA Paper 81-2044

J83-043 Sound Source Radiation in Two-Dimensional Shear Flow. Sebastien M. Candel, *Office National d'Etudes et de Recherches Aerospatiales* (AIAAJ **21**, 2, p. 221) Article based on AIAA Paper 81-2042

J83-044 Aerosound from Corner Flow and Flap Flow. W. C. Meecham, *University of California* (AIAAJ **21**, 2, p. 228) Article based on AIAA Paper 81-2039

J83-045 Screech Suppression in Supersonic Jets. T. D. Norum, *NASA Langley Research Center* (AIAAJ **21**, 2, p. 235) Article based on AIAA Paper 82-0050

J83-046 Flowfield Experiments on a DF Chemical Laser. Richard J. Driscoll and George W. Tregay, *Bell Aerospace Textron* (AIAAJ **21**, 2, p. 241) Article based on AIAA Paper 81-1271

J83-047 Measurement of the Particle Size Distribution in a Pulsed Hypersonic Flow Facility. J. W. L. Lewis, B. P. Curry and D. P. Weaver, *Calspan Field Services, Inc.* (AIAAJ **21**, 2, p. 247) Article

J83-048 Model for Pure Source Flow Chemical Lasers. Kerry E. Patterson, Jad H. Batteh and Steade S. Howle, *Science Applications, Inc.* (AIAAJ **21**, 2, p. 253) Article based on AIAA Paper 82-0400

J83-049 Application of the Finite-Element Method to One-Dimensional Flame Propagation Problems. D. N. Lee and J. I. Ramos, *Carnegie-Melton University* (AIAAJ **21**, 2, p. 262) Article based on AIAA Paper 82-0035

J83-050 Measurements of Reactive Recirculating Jet Mixing in a Combustor. Gary D. Smith, Thomas V. Giel and Carl G. Catalano, *The University of Tennessee Space Institute* (AIAAJ **21**, 2, p. 270) Article based on AIAA Paper 81-1122

J83-051 Minimum Angular Vibration Design of Airborne Electro-Optical Packages. P. W. Whaley, *University of Nebraska* (AIAAJ **21**, 2, p. 277) Article based on AIAA Paper 81-0520 CP811

J83-052 Flutter of Orthotropic Panels in Supersonic Flow Using Affine Transformations. Gabriel A. Oyibo, *Rensselaer Polytechnic Institute* (AIAAJ **21**, 2, p. 283) Article

J83-053 Experiments on Natural Convection Heat Transfer in Low Aspect Ratio Enclosures. Y. Kamotani, L. W. Wang and S. Ostrach, *Case Western Reserve University* (AIAAJ **21**, 2, p. 290) Article based on AIAA Paper 81-1066

J83-054 A Three-Dimensional Modified Stongly Implicit Procedure for Heat Conduction. M. Zedan and G. E. Schneider, *University of Waterloo (Canada)* (AIAAJ **21**, 2, p. 295) Article based on AIAA Paper 81-1136

J83-055 Transonic Airfoil Calculations Using Solution-Adaptive Grids. Terry L. Holst, *NASA Ames Research Center*; and David Brown, *Informatics, Inc.* (AIAAJ **21**, 2, p. 304) Technical Note based on AIAA Paper 81-1010 CP814

J83-056 Effect of Pulsed Slot Suction on a Turbulent Boundary Layer. J. Arakeri and R. Narasimha, *Indian Institute of Science* (AIAAJ **21**, 2, p. 306) Technical Note

J83-057 Hot-Film Anemometer Measurements in a Starting Turbulent Jet. Peter O. Witze, *Sandia National Laboratories* (AIAAJ **21**, 2, p. 308) Technical Note

J83-058 Application of Solid-Phase Transition Kinetics to the Properties of HMX. R. J. Karpowicz, L.S. Gelfand and T. B. Brill, *University of Delaware* (AIAAJ **21**, 2, p. 310) Technical Note

J83-059 Vibrations of Nonuniform Beams with One End Elastically Restrained against Rotation. P. Verniere de Irassar, G. M. Ficcadenti and P. A. A. Laura, *Institute of Applied Mechanics, Puerto Belgrano Naval Base (Argentina)* (AIAAJ **21**, 2, p. 312) Technical Note

J83-060 Parameters for the Simulation of High Temperature Blown Shock Layers. R. N. Gupta, *NASA Langley Research Center* (AIAAJ **21**, 2, p. 314) Technical Note

J83-065 Idealized Model for Plasma Acceleration in an MHD Channel. K. Kuriki, Y. Kunii and Y. Shimizu, *Institute of Space and Astronautical Science (Japan)* (AIAAJ **21**, 3, p. 322) Article based on AIAA Paper 81-0685

J83-066 Numerical Solution of Transonic Stream Function Equation. Mohamed Hafez and Donald Lovell, *George Washington University, NASA Langley Research Center* (AIAAJ **21**, 3, p. 327) Article based on AIAA Paper 81-1017 CP814

J83-067 Conventional Profile Coaxial Jet Noise Prediction. James R. Stone, Donald E. Groesbeck and Charles L. Zola, *NASA Lewis Research Center* (AIAAJ **21**, 3, p. 336) Article based on AIAA Paper 81-1991

J83-068 A Finite Element Formulation for Steady Transonic Euler Equations. A. Ecer and H. U. Akay, *Purdue University of Indianpolis* (AIAAJ **21**, 3, p. 343) Article based on AIAA Paper 82-0062

J83-069 Inviscid Axisymmetric Jet Impingement with Recirculating Stagnation Regions. A. Rubel, *Grumman Aerospace Corporation* (AIAAJ **21**, 3, p. 351) Article based on AIAA Paper 82-0297

J83-070 An Unsteady Interactive Separation Process. L. L. van Dommelen and S. F. Shen, *Cornell University* (AIAAJ **21**, 3, p. 358) Article based on AIAA Paper 82-0347

J83-071 Unsteady Transonic Flow over Wings Including Inviscid/Viscous Interaction. D. P. Rizzetta and C. J. Borland, *Boeing Military Airplane Company* (AIAAJ **21**, 3, p. 363) Article based on AIAA Paper 82-0352

J83-072 Self-Excited Wave Oscillations in a Water Table. Wladimiro Calarese and Wilbur L. Hankey, *Air Force Aeronautical Laboratories (WPAFB)* (AIAAJ **21**, 3, p. 372) Article based on AIAA Paper 82-0233

J83-073 Correlation of Preston Tube Data with Laminar Skin Friction. T. D. Reed and A. Abu-Mostafa, *Oklahoma State University*; and F. S. Steinle Jr., *NASA Ames Research Center* (AIAAJ **21**, 3, p. 379) Synoptic

J83-074 Pressure Wave Attenuation Due to Anode Mufflers in Pulsed Lasers. B. N. Srivastava, *Avco Everett Research Laboratory, Inc.* (AIAAJ **21**, 3, p. 381) Article based on AIAA Paper 81-1282

J83-075 Flow Visualization Methods for Separated Three-Dimensional Shock Wave/Turbulent Boundary-Layer Interactions. Gary S. Settles and Hsueh-Ying Teng, *Princeton University* (AIAAJ **21**, 3, p. 390) Article based on AIAA Paper 82-0229

J83-076 Calculation of Symmetric Vortex Separation Affecting Subsonic Bodies at High Incidence. D. Almosnino and J. Rom, *Technion-Israel Institute of Technology* (AIAAJ **21**, 3, p. 398) Article

J83-077 Blade Loading and Rotation Effects on Compressor Rotor Wake Near End Walls. B. Lakshminarayana, T. R. Govindan and B. Reynolds, *The Pennsylvania State University* (AIAAJ **21**, 3, p. 407) Article based on AIAA Paper 81-0193

J83-078 Numerical Studies of Laminar Flame Propagation in Spherical Bombs. J. I. Ramos, *Carnegie-Mellon University* (AIAAJ **21**, 3, p. 415) Article based on AIAA Paper 82-0038

J83-079 Liftoff Characteristics of Turbulent Jet Diffusion Flames. Norbert Peters, *Rheinisch-Westfalische Technischen Hochschule in Aachen*; and Forman A. Williams, *Princeton University* (AIAAJ **21**, 3, p. 423) Article based on AIAA Paper 82-0111

J83-080 Optimal Laminated Composite Shells for Buckling and Vibration. Y. S. Nshanian, *Ministry of Agriculture (U.S.S.R.)*; and M. Pappas, *New Jersey Institute of Technology* (AIAAJ **21**, 3, p. 430) Article based on AIAA Paper 81-0555 CP811

J83-081 Evaluation of Creep Crack Growth Criteria for IN-100 at Elevated Temperature. T. D. Hinnerichs, *U. S. Air Force Weapons L!boratory, Kirkland AFB*; A. N. Palazotto, *Air Force Institute of Technology (WPAFB)*; and T. Nicholas, *Air Force Wright Aeronautical Laboratories* (AIAAJ **21**, 3, p. 438) Article based on AIAA Paper 81-0540 CP811

J83-082 Computation of Normal Modes from Identified Complex Modes. S. R. Ibrahim, *Old Dominion University* (AIAAJ **21**, 3, p. 446) Article

J83-083 Hydroelastic Effects of Separated Flow. L. E. Ericsson, *Lockheed Missles & Space Company, Inc.* (AIAAJ **21**, 3, p. 452) Article based on AIAA Paper 82-0344

J83-084 Rain-Induced Vibration. R. Rodeman and D. B. Longcope, *Sandia National Laboratories* (AIAAJ **21**, 3, p. 459) Article

J83-085 Quadrature Formulas for Chordwise Integrals of Lifting Surface Theories. Shigenori Ando and Akio Ichikawa, *Nagoya University (Japan)* (AIAAJ **21**, 3, p. 466) Technical Note

J83-086 Freestream Tubulence and Transonic Flow over a "Bump" Model. S. Raghunathan and R.J.W. McAdam, *The Queen's University of Belfast* (AIAAJ **21**, 3, p. 467) Technical Note

J83-087 Dynamic Stability Boundaries for a Sinusoidal Shallow Arch under Pulse Loads. Michael T. Donaldson and Raymond H. Plaut, *Virginia Polytechnic Institute and State University* (AIAAJ **21**, 3, p. 469) Technical Note

J83-088 Application of Variational Embedding Technique to Nonlinear Heat Transfer Problems. Yih-Min Chang, Cha'o-Kuang Chen and Cheng-I Weng, *National Cheng Kung University (Republic of China)* (AIAAJ **21**, 3, p. 471) Technical Note

J83-089 Evaluation of Total Body Heat Transfer in Hypersonic Flow. Richard L. Baker and Raymond F. Kramer, *The Aerospace Corporation* (AIAAJ **21**, 3, p. 473) Technical Note

J83-0093 Equivalent *G/E* of Helicopter Rotor Blades. Aviv Rosen, *Technion – Israel Institute of Technology* (AIAAJ **21**, 3, p. 478) Readers' Forum

Reply by Dewey H. Hodges, *U. S. Army Research and Technology Laboratories (AVRADCOM), Ames Research Center* (AIAAJ **21**, 3, p. 479)

J83-097 Viscous Stability of Compressible Axisymmetric Jets. Philip J. Morris, *The Pennsylvania State University* (AIAAJ **21**, 4, p. 481) Synoptic based on AIAA Paper 80-1004

J83-098 Visualization of Multijet Impingement Flow. K. R. Saripalli, *McDonnell Douglas Corporation* (AIAAJ **21**, 4, p. 483) Synoptic based on AIAA Paper 81-1364

J83-099 Riblets as a Viscous Drag Reduction Technique. Michael J. Walsh, *NASA Langley Research Center* (AIAAJ **21**, 4, p. 485) Synoptic based on AIAA Paper 82-0169

J83-100 Nonlinear Truncation Error Analysis of Finite Difference Schemes for the Euler Equations. Goetz H. Klopfer, *Nielsen Engineering & Research, Inc.*; and David S. McRae, *NASA Ames Research Center* (AIAAJ **21**, 4, p. 487) Article based on AIAA Paper 81-0193

J83-101 Wall Pressure Fluctuations in Attached Boundary-Layer Flow. A. L. Laganelli and A. Martellucci, *Science Applications, Inc.*; and L. L. Shaw, *AFWAL/FIBE (WPAFB)* (AIAAJ **21**, 4, p. 495) Article based on AIAA Paper 81-1227

J83-102 Freestream Turbulence Effects on Attached Subsonic Turbulent Boundary Layers. S. Raghunathan and R. J. W. McAdam, *Queen's University of Belfast* (AIAAJ **21**, 4, p. 503) Article based on AIAA Paper 82-0029

J83-103 Prediction of Rough-Wall Skin Friction and Heat Transfer. George H. Christoph, *Science Applications, Inc.*; and Richard H. Pletcher, *Iowa State University* (AIAAJ **21**, 4, p. 509) Article based on AIAA Paper 82-0031

J83-104 A Higher Order Panel Method Applied to Vortex Sheet Roll-Up. H. W. M. Hoeijmakers and W. Vaatstra, *National Aerospace Laboratory NLR (The Netherlands)* (AIAAJ **21**, 4, p. 516) Article based on AIAA Paper 82-0096

J83-105 An Interaction Algorithm for Three-Dimensional Turbulent Subsonic Aerodynamic Juncture Region Flow. A. J. Baker, *Universtiy of Tennessee*; and J. A. Orzechowski, *Computational Mechanics Consultants, Inc.* (AIAAJ **21**, 4, p. 524) Article based on AIAA Paper 82-0100

J83-106 A Method of Predicting Unsteady Turbulent Flows and Its Application to Diffusers with Unsteady Inlet Conditions. A. A. Lyrio and J. H. Ferziger, *Stanford University* (AIAAJ **21**, 4, p. 534) Article based on AIAA Paper 82-0349

J83-107 Thermal Homogeneity in a Closed Excimer Laser Cavity. Charles J. Knight, *Avco Everett Research Laboratory, Inc.* (AIAAJ **21**, 4, p. 541) Article based on AIAA Paper 81-1132

J83-108 Oil Flow Separation Patterns on an Ogive Forebody. Earl R. Keener, *NASA Ames Research Center* (AIAAJ **21**, 4, p. 550) Article

J83-109 A Numerical Study of Nonlinear Instability Phenomena in Solid Rocket Motors. Jay N. Levine, *Air Force Rocket Laboratory/DYC (Edwards AFB)*; and Joseph D. Baum, *University of Dayton* (AIAAJ **21**, 4, p. 557) Article based on AIAA Paper 81-1524

J83-110 Experimental Study of Jet Mixing Mechanisms in a Model Secondary Combustor. N. Ishikawa, *Japan Defense Agency* (AIAAJ **21**, 4, p. 565) Article based on AIAA Paper 81-1470

J83-111 Shock Waves Ahead of a Fan with Nonuniform Blades. A. M. Cargill, *Leeds University & Rolls-Royce Limited (England)* (AIAAJ **21**, 4, p. 572) Article

J83-134 Spectral Analysis Algorithms for the Laser Velocimeter: A Comparative Study. W. A. Bell, *Lockheed-Georgia Company* (AIAAJ **21**, 5, p. 714) Article based on AIAA Paper 81-1196

J83-135 A Pocket Model for Aluminum Agglomeration in Composite Propellants. Norman S. Cohen, *Jet Propulsion Laboratory, California Institute of Technology* (AIAAJ **21**, 5, p. 720) Article based on AIAA Paper 81-1585

J83-136 Application of a Three-Sensor Hot-Wire Probe for Incompressible Flow. T. L. Butler, *Pratt & Whitney Aircraft Group*; and J. W. Wagner, *United Technologies Research Center* (AIAAJ **21**, 5, p. 726) Article based on AIAA Paper 82-0195

J83-137 The Design and Combustion Performance of Practical Swirlers for Integral Rocket/Ramjets. P. L. Buckley, R. R. Craig, D. L. Davis and K. G. Schwartzkopf, *U. S. Air Force Wright Aeronautical Laboratories* (AIAAJ **21**, 5, p. 733) Article based on AIAA Paper 80-1119

J83-138 Fractional Calculus--A Different Approach to the Analysis of Viscoelastically Damped Structures. Ronald L. Bagley, *United States Air Force Academy*; and Peter J. Torvik, *Air Force Institute of Technology (WPAFB)* (AIAAJ **21**, 5, p. 741) Article based on AIAA Paper 81-0484 CP811

J83-139 An Alternating Method for Analysis of Surface-Flawed Aircraft Structural Components. T. Nishioka and S. N. Atluri, *Georgia Institute of Technology* (AIAAJ **21**, 5, p. 749) Article based on AIAA Paper 82-0742 CP823

J83-140 Buckled Plate Vibrations and Large Amplitude Vibrations Using High-Order Triangular Elements. T. Y. Yang and A. D. Han, *Purdue University* (AIAAJ **21**, 5, p. 758) Article

J83-141 Unified Panel Flutter Theory with Viscous Damping Effects. Gabriel A. Oyibo, *Fairchild Republic Company* (AIAAJ **21**, 5, p. 767) Article

J83-142 Performance of a Cylindrical Phase-Change Thermal Energy Storage Unit. R. Ponnappan and Dean L. Jacobson, *Arizona State University* (AIAAJ **21**, 5, p. 774) Article based on AIAA Paper 82-0076

J83-143 Induced Drag of a Slender Wing in a Nonuniform Stream. M. Hanin and A. Nagy-Barsony, *Technion-Israel Institute of Technology* (AIAAJ **21**, 5, p. 781) Technical Note

J83-144 Simple and Accurate Calculation of Supersonic Nozzle Contour. Yehuda Nachshon, *Armament Development Authority (Israel)* (AIAAJ **21**, 5, p. 783) Technical Note

J83-145 Nonlinear Resonant Interactions in Internal Cavity Flows. L. King Issacson and Alan G. Marshall, *University of Utah* (AIAAJ **21**, 5, p. 785) Technical Note

J83-146 A Fuzzy Algorithm to Compute Transonic Profile Flow. Tuhin K. Das, *Jadavpur University (India)* (AIAAJ **21**, 5, p. 786) Technical Note

J83-147 Axial Wavenumber Measurements in Axisymmetric Jets. G. L. Morrison and Kevin Whitaker, *Texas A&M University* (AIAAJ **21**, 5, p. 788) Technical Note based on AIAA Paper 82-0049

J83-148 Computations of Unsteady Transonic Cascade Flows. David Nixon, *Nielsen Engineering & Research, Inc.* (AIAAJ **21**, 5, p. 790) Technical Note

J83-149 Finite Element Modeling Techniques for Constrained Layer Damping. R. E. Holman and J. M. Tanner, *Hughes Aircraft Company* (AIAAJ **21**, 5, p. 792) Technical Note based on AIAA Paper 81-0485 CP811

J83-150 Buckling of Very Thin, Nearly Perfect Axially Loaded Circular Cylindrical Shells. C. G. Foster, *University of Tasmania* (AIAAJ **21**, 5, p. 794) Technical Note

J83-151 Orthogonal Polynomials as Variable-Order Finite Element Shape Functions. Dewey H. Hodges, *U. S. Army Research and Technology Laboratories (AVRADCOM)* (AIAAJ **21**, 5, p. 796) Technical Note

J83-152 Extrapolation of Optimum Design Based on Sensitivity Derivatives. Jean-Francois M. Barthelemy, *Virginia Polytechnic Institute and State University*; and Jaroslaw Sobieszczanski-Sobieski, *NASA Langley Research Center* (AIAA J **21**, 5, p. 797) Technical Note

J83-154 Separated Trailing-Edge Flow at a Transonic Mach Number. P. R. Viswanath, *Sanford University*; and J. L. Brown, *NASA Ames Research Center* (AIAAJ **21**, 6, p. 801) Article based on AIAA Paper 82-0348

J83-155 Aerodynamic Theory for Wing with Side Edge Passing Subsonically through a Gust. Rudolph Martinez and Sheila E. Widnall, *Massachusetts Institute of Technology* (AIAAJ **21**, 6, p. 808) Article

J83-156 A Finite Element Algorithm for Computational Fluid Dynamics. A. J. Baker and M. O. Soliman, *The University of Tennessee* (AIAAJ **21**, 6, p. 816) Article based on AIAA Paper 81-1031 CP814

J83-157 An Implicit, Bidiagonal Numerical Method for Solving the Navier-Stokes Equations. E. von Lavante and W. T. Thompkins Jr., *Massachusetts Institute of Technology* (AIAAJ **21**, 6, p. 828) Article based on AIAA Paper 82-0063

J83-158 Computation of Nonequilibrium, Supersonic Three-Dimensional Inviscid Flow over Blunt-Nosed Bodies. John V. Rakich, Harry E. Bailey and Chul Park, *NASA Ames Research Center* (AIAAJ **21**, 6, p. 834) Article based on AIAA Paper 75-835

J83-159 Transonic Flow Calculations Using the Euler Equations. H. L. Atkins and H. A. Hassan, *North Carolina State University* (AIAAJ **21**, 6, p. 842) Article based on AIAA Paper 82-0106

J83-160 A More Accurate Transonic Computational Method for Wing-Body Configurations. L. T. Chen, *McDonnell Douglas Corporation* (AIAAJ **21**, 6, p. 848) Article based on AIAA Paper 82-0162

J83-161 Decay of Streamwise Vorticity Downstream of a Three-Dimensional Protuberance. Clarence W. Kitchens Jr., Nathan Gerber and Raymond Sedney, *U. S. Army Armament Research and Development Command, Aberdeen Proving Ground*; and Joan M. Bartos, *U. S. Army Armament Research and Develoment Command, Aberdeen Proving Ground* (AIAAJ **21**, 6, p. 856) Article based on AIAA Paper 82-0217

J83-162 Numerical Solution of Transonic Wing Flowfields. Terry L. Holst, *NASA Ames Research Center*; and Scott D. Thomas, *Informatics General Corporation* (AIAAJ **21**, 6, p. 863) Article based on AIAA Paper 82-0105

J83-163 A Split-Coefficient/Locally Monotonic Scheme for Multishocked Supersonic Flow. James E. Daywitt and David J. Szostowski, *General Electric Company*; and Dale A. Anderson, *Iowa State University* (AIAAJ **21**, 6, p. 871) Technical Note based on AIAA Paper 82-0287

J83-164 Compressible Helicoidal Surface Theory for Propeller Aerodynamics and Noise. Donald B. Hanson, *Hamilton Standard* (AIAAJ **21**, 6, p. 881) Article

J83-165 Some Analysis Methods for Rotating Systems with Periodic Coefficients. John Dugundji and John H. Wendell, *Massachusetts Institute of Technology* (AIAAJ **21**, 6, p. 890) Article

J83-166 Dynamic Modeling of Structures from Measured Complex Modes. Samir R. Ibrahim, *Old Dominion University* (AIAAJ **21**, 6, p. 898) Article based on AIAA Paper 82-0770 CP824

J83-167 Pseudo-Updated Constrained Solution Algorithm for Nonlinear Heat Conduction. Surapong Tovichakchaikul and Joseph Padovan, *The University of Akron* (AIAAJ **21**, 6, p. 902) Article

J83-168 Bow Wave Patterns. Yong K. Chung, *Ah-ju University (Korea)* (AIAAJ **21**, 6, p. 909) Technical Note

J83-169 Force and Moment in Incompressible Flows. Luigi Quartapelle, *Istituto di Fisica, Politecnico de Milano*; and Michele Napolitano, *Istituto di Macchine, Universita di Bari* (AIAAJ **21**, 6, p. 911) Technical Note

J83-170 Optimum Sensitivity Derivatives of Objective Functions in Nonlinear Programming. Jean-Francois M. Barthelemy, *Virginia Polytechnic Institute and State University*; and Jaroslaw Sobieszczanski-Sobieski, *NASA Langley Research Center* (AIAAJ **21**, 6, p. 913) Technical Note

J83-171 Vorticity at the Shock Foot in Inviscid Flow. K.-Y. Fung, *University of Arizona* (AIAAJ **21**, 6, p. 915) Technical Note

J83-172 Efficient Computation of Volume in Flow Predictions. W. Kordulla, *NASA Ames Research Center*; and M. Vinokur, *University of Santa Clara* (AIAAJ **21**, 6, p. 917) Technical Note

J83-173 Unsteady Transonic Small Disturbance Approximation with Strong Shock Waves. G. David Kerlick and David Nixon, *Nielsen Engineering & Research, Inc.*; and William F. Ballhaus Jr., *NASA Ames Research Center* (AIAAJ **21**, 6, p. 918) Technical Note based on AIAA Paper 82-0159

J83-174 Effects of Artificial Excitation upon a Low Reynolds Number Mach 2.5 Jet. G. L. Morrison, *Texas A&M University* (AIAAJ **21**, 6, p. 920) Technical Note based on AIAA Paper 81-2010

J83-175 Analytical Approximation of Two-Dimensional Separated Turbulent Boundary-Layer Velocity Profiles. T. W. Swafford, *Sverdrup Technology, Inc.* (AIAAJ **21**, 6, p. 923) Technical Note

J83-176 Compressibility Effects in Turbulent Shear Layers. D. W. Bogdanoff, *University of Washington* (AIAAJ **21**, 6, p. 926) Technical Note

J83-177 Numerical Calculation of Nonlinear Aerodynamics of Wing-Body Configurations. Z. Rusak, E. Wasserstrom and A. Seginer, *Technion-Israel Institute of Technology* (AIAAJ **21**, 7, p. 929) Article

J83-178 Edge Tones in High-Speed Flows and Their Application to Multiple-Jet Mixing. A. Krothapalli, K. Karamcheti, Y. Hsia and D. Baganoff, *Joint Institute for Aeronautics and Acoustics, Stanford University* (AIAAJ **21**, 7, p. 937) Synoptic based on AIAA Paper 82-0120

J83-179 Single- and Multiple-Crater Induced Nosetip Transition. A. Todisco, B. Reeves, D. Siegelman and R. Mascola, *AVCO Systems Division* (AIAAJ **21**, 7, p. 939) Synoptic based on AIAA Paper 81-1087

J83-180 Turbulence Modeling for Computational Aerodynamics. Joseph G. Marvin, *NASA Ames Research Center* (AIAAJ **21**, 7, p. 941) Survey Paper based on AIAA Paper 82-0164

J83-181 Effects of Properties and Location in the Plume on Droplet Diameter for Injection in a Supersonic Stream. A. S. Nejad and J. A. Schetz, *Virginia Polytechnic Institute and State University* (AIAAJ **21**, 7, p. 956) Article based on AIAA Paper 81-0188

J83-182 Analysis of Viscous-Inviscid Interaction in Transonic Internal Flows. Meng-Sing Liou, *McDonnell Douglas Corporation* (AIAAJ **21**, 7, p. 962) Article based on AIAA Paper 81-0004

J83-183 Mode Propagation in Nonuniform Circular Ducts with Potential Flow. Y. C. Cho, *NASA Lewis Research Center*; and K. U. Ingard, *Massachusetts Institute of Technology* (AIAAJ **21**, 7, p. 970) Article based on AIAA Paper 82-0122

J83-184 Constraints on the Invariant Functions of Axisymmetric Turbulence. E. J. Kerschen, *General Electric Company* (AIAAJ **21**, 7, p. 978) Article

J83-185 Investigation of Two Plane Parallel Jets. H. Elbanna and S. Gahin, *King Abdulaziz University (Saudi Arabia)*; and M. I. I. Rashed, *Cairo University* (AIAAJ **21**, 7, p. 986) Article

J83-186 Seven-Hole Cone Probes for High Angle Flow Measurement: Theory and Calibration. K. N. Everett, A. A. Gerner and D. A. Durston, *NASA Ames Research Center* (AIAAJ **21**, 7, p. 992) Article based on AIAA Paper 82-0232

J83-187 Three-Dimensional Flow Studies on a Slotted Transonic Wind Tunnel Wall. J. M. Wu, F. G. Collins and M. K. Bhat, *The University of Tennessee Space Institute* (AIAAJ **21**, 7, p. 999) Article based on AIAA Paper 82-0230

J83-188 Boron Particle Ignition in a Restricted Thermodynamical Equilibrium. Dirk Meinkohn and Jurgen W. Bergmann, *Deutsche Forschungs- und Versuchsanstalt fur Luft- un Raumfahrt e. V.* (AIAAJ **21**, 7, p. 1006) Synoptic

J83-189 Interaction of Oblique Shock and Detonation Waves. Y. Sheng and J. P. Sislian, *University of Toronto* (AIAAJ **21**, 7, p. 1008) Article

J83-190 Minimum-Weight Design of an Orthotropic Shear Panel with Fixed Flutter Speed. L. Beiner, *Ben Gurion University*; and L. Librescu, *Tel Aviv University* (AIAAJ **21**, 7, p. 1015) Synoptic

J83-191 Free Vibrations of Simply Supported Cylindrical Shells of Oval Cross Section. V. K. Koumousis and A. E. Armenakas, *Polytechnic Institute of New York* (AIAAJ **21**, 7, p. 1017) Article

J83-192 Stress Constraints and Screening for Optimality Criteria Design. R. Levy, *Jet Propulsion Laboratory, California Institute of Technology* (AIAAJ **21**, 7, p. 1028) Article based on AIAA Paper 82-0716

J83-193 Smooth Contact Between a Rigid Indenter and an Initially Stressed Orthotropic Beam. L. M. Keer and R. Ballarini, *Northwestern University* (AIAAJ **21**, 7, p. 1035) Article

J83-194 A Variation on MacCormack's Method for Axisymmetric Viscous Compressible Flows. John F. Stalnaker, *Lockheed-Huntsville Research & Engineering Center* (AIAAJ **21**, 7, p. 1043) Technical Note

J83-195 Penetration and Breakup of Slurry Jets in a Supersonic Stream. D. M. Less and J. A. Schetz, *Virginia Polytechnic Institute and State University* (AIAAJ **21**, 7, p. 1045) Technical Note

J83-196 Further Experiments on Shock Tube Wall Boundary-Layer Transition. Michael J. Chaney and William J. Cook, *Iowa State University* (AIAAJ **21**, 7, p. 1046) Technical Note

J83-197 Derivation of the Fundamental Equation of Sound Generated by Moving Aerodynamic Surfaces. Hans R. Aggarwal, *University of Santa Clara* (AIAAJ **21**, 7, p. 1048) Technical Note

J83-198 Transverse Vibrations of Nonuniform Rectangular Orthotropic Plates. J. S. Tomar and R. K. Sharma, *University of Roorkee (India)*; and D. C. Gupta, *J. V. Jain Postgraduate College (India)* (AIAAJ **21**, 7, p. 1050) Technical Note

J83-199 Stability of Short Beck and Leipholz Columns on Elastic Foundation. V. Sundararamaiah and Venkateswara Rao. G., *Vikram Sarabhai Space Center (India)* (AIAAJ **21**, 7, p. 1053) Technical Note

J83-200 Effect of Nonlinear Characteristics on Temperature Distribution in a Rocket Grain. P. A. A. Laura and R. H. Gutierrez, *Institute of Applied Mechanics, Puerto Belgrano Naval Base (Argentina)* (AIAAJ **21**, 7, p. 1055) Technical Note

J83-201 Acoustic Interaction with a Turbulent Plane Jet--Some Effects on Turbulent Structure. F. W. Chambers, *Lockheed-Georgia Co.*; and V. W. Goldschmidt , *Purdue University* (AIAAJ **21**, 8, p. 1057) Synoptic based on AIAA Paper 82-0048

J83-202 Applications of Exponential Splines in Computational Fluid Dynamics. B. J. McCartin, *Pratt & Whitney Aircraft* (AIAAJ **21**, 8, p. 1059) Article based on AIAA Paper 81-0995 CP814

J83-203 Flow and Heat Transfer on a Disk Rotating Beneath a Forced Vortex. B. G. Newman, *McGill University (Canada)* (AIAAJ **21**, 8, p. 1066) Article based on AIAA Paper 82-0194

J83-204 Finite Element Methods for Transonic Flow Analysis. Kenneth E. Tatum, *McDonnell Douglas Corporation* (AIAAJ **21**, 8, p. 1071) Article based on AIAA Paper 82-0930

J83-205 A Vortex Sheet Method for Calculating Separated Two-Dimensional Flows. M. Ribaut, *Brown Boveri Ltd. (Switzerland)* (AIAAJ **21**, 8, p. 1079) Article based on AIAA Paper 82-1030

J83-206 Time-Resolved Two-Dimensional Concentration Measurements in an Acoustically Driven Flow. Marshall B. Long, Huey-Ming Tzeng and Dominique Fourguette, *Yale University* (AIAAJ **21**, 8, p. 1085) Article

J83-207 Temperature Requirements and Corrosion Rates in Combustion Driven Hydrogen Fluoride Supersonic Diffusion Lasers. Paul C. Nordine, *Yale University* (AIAAJ **21**, 8, p. 1089) Article

J83-208 Simple Model for Base Pressure Effects in Source Flow Chemical Lasers. Kerry E. Patterson, Jad H. Batteh and Steade S. Howie, *Science Applications, Inc.* (AIAAJ **21**, 8, p. 1093) Article based on AIAA Paper 82-0399

J83-209 Fluorescence Measurements of OH in a Turbulent Flame. M. Azzazy and John W. Daily, *University of California* (AIAAJ **21**, 8, p. 1100) Article based on AIAA Paper 82-0239

J83-210 Acoustic Signature from Flames as a Combustion Diagnostic Tool. M. K. Ramachandra and W. C. Strahle, *Georgia Institute of Technology* (AIAAJ **21**, 8, p. 1107) Article based on AIAA Paper 82-0039

J83-211 Flame Velocity for the Onset of Detonation. Tadaaki Inomata, Satiko Okazaki, Takao Moriwaki and Momotaro Suzuki, *Sophia University (Japan)* (AIAAJ **21**, 8, p. 1115) Article

J83-212 Incomplete Combustion: A Possible Cause of Combustion Instability. H. F. R. Schoyer, *Delft University of Technology (The Netherlands)* (AIAAJ **21**, 8, p. 1119) Article

J83-213 Calculation of Various Diffuser Flows with Inlet Swirl and Inlet Distortion Effects. C. Hah, *General Electric Company* (AIAAJ **21**, 8, p. 1127) Article based on AIAA Paper 82-1003

J83-214 Blade Loss Transient Dynamic Analysis of Turbomachinery. M. J. Stallone, V. Gallardo, A. F. Storace, L. J. Bach, G. Black and E. F. Gaffney, *General Electric Company* (AIAAJ **21**, 8, p. 1134) Article based on AIAA Paper 82-1057

J83-215 Influence of Atomizer Design Features on Mean Drop Size. N. K. Rizk, *Cairo University*; and A. H. Lefebvre, *Purdue University* (AIAAJ **21**, 8, p. 1139) Article based on AIAA Paper 82-1073

J83-216 An Inelastic Finite Element Model of 4D Carbon-Carbon Composites. L. Delneste and B. Perez, *Societe Europeenne de Propulsion (France)* (AIAAJ **21**, 8, p. 1143) Article based on AIAA Paper 81-1463

J83-217 Generic Buckling Curves for Specially Orthotropic Rectangular Plates. E. J. Brunelle and G. A. Oyibo, *Rensselaer Polytechnic Institute* (AIAAJ **21**, 8, p. 1150) Article

J83-218 Postbuckling Behavior of a Thick Plate. Lien-Wen Chen and Ji-Liang Doong, *National Cheng Kung University (Republic of China)* (AIAAJ **21**, 8, p. 1157) Article

J83-219 Analysis of a Thin-Walled Pressurized Torus in Contact with a Plane. Michael J. Mack Jr., *Hewlett-Packard Company*; Paul M. Gassman, *Fisher Controls Company*; and Joseph R. Baumgarten, *Iowa State University* (AIAAJ **21**, 8, p. 1152) Article based on AIAA Paper 82-0702 CP823

J83-220 Improvement of a Large Analytical Model Using Test Data. A. Berman and E. J. Nagy, *Kaman Aerospace Corporation* (AIAAJ **21**, 8, p. 1168) Article based on AIAA Paper 82-0743 CP823

J83-221 Effect of Static Preloading on a Dynamic Stability of Structures. George J. Simitses, *Georgia Institute of Technology* (AIAAJ **21**, 8, p. 1174) Article based on AIAA Paper 82-0692 CP824

J83-222 Nonlinear Analysis of Optimized Structure with Constraints on System Stability. N. S. Khot, *Air Force Wright Aeronautical Laboratories (WPAFB)* (AIAAJ **21**, 8, p. 1181) Article based on AIAA Paper 82-0715 CP824

J83-223 The Dynamic Collapse of a Column Impacting a Rigid Surface. Jerrold M. Housner and Norman F. Knight Jr., *NASA Langley Research Center* (AIAAJ **21**, 8, p. 1187) Article based on AIAA Paper 82-0735 CP824

J83-224 *P-N* Approximation for Radiative Heat Transfer in a Nongray Medium. Adnan Yucel and Yildiz Bayazitoglu, *Rice University* (AIAA J **21**, 8, p. 1196) Article

J83-225 Experimental Determination of Vapor Species from Laser-Ablated Carbon Phenolic Composites. Kenneth A. Lincoln, *NASA Ames Research Center* (AIAAJ **21**, 8, p. 1204) Article

J83-226 Pseudospectral Approximation in a Three-Dimensional Navier-Stokes Code. K. C. Reddy, *Arnold Engineering Development Center* (AIAAJ **21**, 8, p. 1208) Technical Note

J83-227 Reynolds Stresses for Unsteady Turbulent Flows. Wilbur L. Hankey and Wladimiro Calarese, *Air Force Wright Aeronautical Laboratories* (AIAAJ **21**, 8, p. 1210) Technical Note

J83-228 Buckling of Sinusoidally Corrugated Plates under Axial Compression. Susumu Toda, *National Aerospace Laboratory (Japan)* (AIAAJ **21**, 8, p. 1211) Technical Note

J83-229 Stagnation Point Heat Transfer for Jet Impingement to a Plane Surface. P. S. Shadlesky, *Morton Thiokol Corporation* (AIAAJ **21**, 8, p. 1214) Technical Note

J83-230 The Life Cycle of a Tornadic Cloud as Seen From a Geosynchronous Satellite. R. J. Hung, *The University of Alabama*; James C. Dodge, *NASA Headquarters*; and Robert E. Smith, *NASA George C. Marshall Space Flight Center* (AIAAJ **21**, 9, p. 1217) Article

J83-231 An Aeroacoustic Model for High-Speed, Unsteady Blade-Vortex Interaction. Rudolph Martinez and Sheila E. Widnall, *Massachusetts Institute of Technology* (AIAAJ **21**, 9, p. 1225) Article

J83-232 Characteristic Frequencies of Transonic Diffuser Flow Oscillations. T. J. Bogar, M. Sajben and J. C. Kroutil, *McDonnell Douglas Corporation* (AIAAJ **21**, 9, p. 1232) Article based on AIAA Paper 81-1291

J83-233 Numerical Experiments with the Osher Upwind Scheme for the Euler Equations. Sukumar R. Chakravarthy, *Stanford University*; and Stanley Osher, *University of California* (AIAAJ **20**, 9, p. 1241) Article based on AIAA Paper 82-0975

J83-234 A Finite-Volume, Adaptive Grid Algorithm Applied to Planetary Entry Flowfields. P. A. Gnoffo, *NASA Langley*

Research Center (AIAAJ **21**, 9, p. 1249) Article based on AIAA Paper 82-1018

J83-235 Prediction of Separated Asymmetric Trailing-Edge Flows at Transonic Mach Numbers. C. C. Horstman, *NASA Ames Research Center* (AIAAJ **21**, 9, p. 1255) Article based on AIAA Paper 82-1021

J83-236 An Efficient, Full-Potential Implicit Method Based on Characteristics for Supersonic Flows. Vijaya Shankar, *Rockwell International Science Center*; and Stanley Osher, *University of California* (AIAAJ **21**, 9, p. 1262) Article based on AIAA Paper 82-0974

J83-237 A Grid Overlapping Scheme for Flowfield Computations About Multicomponent Configurations. Essam H. Atta and Joseph Vadyak, *Lockheed-Georgia Company* (AIAAJ **21**, 9, p. 1271) Article based on AIAA Paper 82-1017

J83-238 Spin-Up from Rest in a Differentially Rotating Cylinder. Jae Min Hyun, *Clarkson College of Technology* (AIAAJ **21**, 9, p. 1278) Article

J83-239 Computation of Reacting Flowfield with Radiation Interaction in Chemical Lasers. Victor Quan, Saul F. Persselin and Tien Tsai Yang, *Rockwell International/Rocketdyne Division* (AIAAJ **21**, 9, p. 1283) Article based on AIAA Paper 82-0402

J83-240 Design of Supercritical Cascades with High Solidity. Jose M. Sanz, *Universities Space Research Association* (AIAAJ **21**, 9, p. 1289) Article based on AIAA Paper 82-0954

J83-241 The Fracture Diagram: A New Design Tool for Stiffened Panels. M. M. Ghassem, *Spring, Texas*; and T. P. Rich, *Bucknell University* (AIAAJ **21**, 9, p. 1294) Article

J83-242 Time Integration of the Equations of Motion of a Structural System Including Damping. G. R. Heppler and J. S. Hansen, *University of Toronto* (AIAAJ **21**, 9, p. 1301) Article

J83-243 Nonlinear Inverse Perturbation Method in Dynamic Analysis. Ki-Ook Kim, William J. Anderson and Robert E. Sandstrom, *The University of Michigan* (AIAAJ **21**, 9, p. 1310) Article

J83-244 Large-Amplitude Vibration of an Initially Stressed Thick Circular Plate. Lien-Wen Chen and Ji-Liang Doong, *National Cheng-Kung University (Taiwan)* (AIAAJ **21**, 9, p. 1317) Article

J83-245 Prediction of Interfacial Filler Thickness for Minimum Thermal Contact Resistance. P. W. O'Callaghan, B. Snaith and S. D. Probert, *Cranfield Institute of Technology, (England)*; and F. R. Al-Astrabadi, *Servizio Studi Speciali, Aeritalia Divisione Aviazone* (AIAAJ **21**, 9, p. 1325) Article

J83-246 Numerical Solution of Natural Convection in Eccentric Annuli. Darrell W. Pepper and Roger E. Cooper, *E. I. du Pont de Nemours & Co* (AIAAJ **21**, 9, p. 1331) Article based on AIAA Paper 82-0983

J83-247 Nonequilibrium Radiative Heating of an Ablating Jovian Entry Probe. S. N. Tiwari and S. V. Subramanian, *Old Dominion University* (AIAAJ **21**, 9, p. 1338) Article based on AIAA Paper 80-0356

J83-248 A Discrete Vortex Simulation of Kelvin-Helmholtz Instability. I. G. Bromilow and R. R. Clements, *University of Bristol (England)* (AIAAJ **21**, 9, p. 1345) Technical Note

J83-249 The Two-Dimensional Laminar Wake with Initial Asymmetry. Anthony Demetriades, *Montana State University* (AIAAJ **21**, 9, p. 1347) Technical Note

J83-250 Boundary-Layer and Turbulence Intensity Measurements in a Shock Wave/Boundary-Layer Interaction. S. Raghunathan and R. J. W. McAdam, *The Queen's University of Belfast* (AIAAJ **21**, 9, p. 1349) Technical Note

J83-251 Catalyzed and Inhibited Decomposition of Ammonium Perchlorate. R. P. Rastogi, A. P. Rao and V. Syal, *Gorakhpur University (India)* (AIAAJ **21**, 9, p. 1351) Technical Note

J83-252 Combined Four-Wall Interference Assessment in Two-Dimensional Airfoil Tests. William B. Kemp Jr., *Virginia Associated Research Campus*; and Jerry B. Adcock, *NASA Langley Research Center* (AIAAJ **21**, 10, p. 1353) Article based on AIAA Paper 82-0586 CP822

J83-253 Finite Volume Calculation of Three-Dimensional Potential Flow Around a Propeller. Wen-Huei Jou, *Flow Industries, Inc.* (AIAAJ **21**, 10, p. 1360) Article based on AIAA Paper 82-0957

J83-254 Prediction of Curved Channel Flow with an Extended k-ϵ Model of Turbulence. Farzad Pourahmadi and Joseph A. C. Humphrey, *University of California* (AIAAJ **21**, 10, p. 1365) Article

J83-255 Laboratory Simulations of Controlled Energetic Electron-Beam-Plasma Interactions in Space. E. P. Szuszczewicz, *E. O. Hulburt Center for Space Research, Naval Research Laboratory* (AIAAJ **21**, 10, p. 1374) Article based on AIAA Paper 82-0146

J83-256 The Response of Normal Shocks in Diffusers. F. E. C. Culick, *California Institute of Technology*; and T. Rogers, *The Marquardt Company* (AIAAJ **21**, 10, p. 1382) Article based on AIAA Paper 81-1431

J83-257 An Implicit Lambda Scheme. Andrea Dadone and Michele Napolitano, *Universita di Bari* (AIAAJ **21**, 10, p. 1391) Article based on AIAA Paper 82-0972

J83-258 A Study of Turbulent Flow Downstream of an Abrupt Pipe Expansion. R. S. Amano, *The University of Wisconsin* (AIAAJ **21**, 10, p. 1400) Article based on AIAA Paper 82-1269

J83-259 Effect of Surface Roughness on the Delayed Transition on 9:1 Heated Ellipsoid. Eric W. Hendricks and Daniel M. Ladd, *Naval Ocean Systems Center* (AIAAJ **21**, 10, p. 1406) Article based on AIAA Paper 82-1206

J83-260 Dynamic Behavior of a Bluff-Body Diffusion Flame. W. M. Roquemore and Ronald L. Britton, *Air Force Wright Aeronautical Laboratories*; and Sarwan S. Sandhu, *University of Dayton* (AIAAJ **21**, 10, p. 1410) Article based on AIAA Paper 82-0178

J83-261 Detonation Propulsion Experiments and Theory. Lloyd H. Back, Warren L. Dowler and Giulio Varsi, *Jet Propulsion Laboratory, California Institute of Technology* (AIAAJ **21**, 10, p. 1418) Article based on AIAA Paper 82-1115

J83-262 Thrust Augmenting Ejectors, Part I. Morton Alperin and Jiunn-Jenq Wu, *Flight Dynamics Research Corporation* (AIAAJ **21**, 10, p. 1428) Article

J83-263 Steady-State Evaporation Characteristics of Hydrocarbon Fuel Drops. J. S. Chin and A. H. Lefebvre, *Purdue University* (AIAAJ **21**, 10, p. 1437) Article

J83-264 Optimization of Openings in Plates under Plane Stress. Surendra K. Dhir, *David W. Taylor Naval Ship Research and Development Center* (AIAAJ **21**, 10, p. 1444) Article based on AIAA Paper 82-0717 CP824

J83-265 Low-Velocity Impact Response of Laminated Plates. R. L. Ramkumar and P. C. Chen, *Northrop Corporation* (AIAAJ **21**, 10, p. 1448) Article based on AIAA Paper 82-0750 CP823

J83-266 Nonlinear Panel Flutter Using High-Order Triangular Finite Elements. A. D. Han and T. Y. Yang, *Purdue University* (AIAAJ **21**, 10, p. 1453) Article

J83-267 Damage Tolerant Design Using Collapse Techniques. Raphael T. Haftka, *Virginia Polytechnic Institute and State University* (AIAAJ **21**, 10, p. 1462) Article

J83-268 A Low Mach Number Euler Formulation and Application to Time-Iterative LBI Schemes. W. R. Briley, H. McDonald and S. J. Shamroth, *Scientific Research Associates, Inc.* (AIAAJ **21**, 10, p. 1467) Technical Note

J83-269 Snowing Criteria for Cold Traps. G. M. Harpole, *TRW Space and Technology Group* (AIAAJ **21**, 10, p. 1469) Technical Note based on AIAA Paper 82-0873

J83-270 Engine Power Simulation for Transonic Flow-Through Nacelles. Wilson C. Chin, *Applied AeroNalysis* (AIAAJ **21**, 10, p. 1471) Technical Note

J83-271 Vibration of Triangular Plates. Shaukat Mirza and Mohan Bijlani, *University of Ottawa* (AIAAJ **21**, 10, p. 1472) Technical Note

J83-272 Integrated Thermal-Structural Approach for Shells of Revolution. Dennis J. Fallon and Earl A. Thornton, *Old Dominion University* (AIAAJ **21**, 10, p. 1475) Article based on AIAA Paper 82-0701 CP823

J83-273 Inelastic Buckling of Cylindrical Shells Subjected to Axial Tension and External Pressure. N. C. Huang, *University of Notre Dame*; and P. D. Pattillo, *Amoco Production Company* (AIAAJ **21**, 10, p. 1477) Technical Note

J83-275 A Multigrid Strongly Implicit Procedure for Transonic Potential Flow Problems. N. L. Sankar, *Lockheed-Georgia Company* (AIAAJ **21**, 11, p. 1481) Synoptic based on AIAA Paper 82-0931

J83-276 Predictions of the Structure of Turbulent, Particle-Laden Round Jets. J. S. Shuen, L. D. Chen and G. M. Faeth, *The Pennsylvania State University* (AIAAJ **21**, 11, p. 1483) Synoptic

J83-277 The Boundary Layer on an Axisymmetric Body With and Without Spin. Jerome T. Kegelman, Robert C. Nelson and Thomas J. Mueller, *University of Notre Dame* (AIAAJ **21**, 11, p. 1485) Article based on AIAA Paper 80-1584 CP806

J83-278 Conservative Full-Potential Calculations for Axisymmetric, Transonic Flow. Lawrence L. Green and Jerry C. South Jr., *NASA Langley Research Center* (AIAAJ **21**, 11, p. 1492) Article based on AIAA Paper 81-1204

J83-279 Computation of the Asymmetric Vortex Pattern for Bodies of Revolution. J. E. Graham and W. L. Hankey, *Air Force Wright Aeronautical Laboratories* (AIAAJ **21**, 11, p. 1500) Article based on AIAA Paper 82-0023

J83-280 Experimental Investigation of Curvature Effects on Ventilated Wall Jets. R. M. El-Taher, *King Abdulaziz University (Saudi Arabia)* (AIAAJ **21**, 11, p. 1505) Article

J83-281 Natural Instability of Free Shear Layers. Z. D. Husain and A. K. M. F. Hussain, *University of Houston* (AIAAJ **21**, 11, p. 1512) Article

J83-282 Application of a Finite Element Algorithm to the Solution of Steady Transonic Euler Equations. H. U. Akay and A. Ecer, *Purdue University* (AIAAJ **21**, 11, p. 1518) Article based on AIAA Paper 82-0970

J83-283 Numerical Study of the Turbulent Flow Past an Airfoil with Trailing Edge Separation. C. M. Rhie, *Detroit Diesel Allison*; and W. L. Chow, *University of Illinois at Urbana-Champaign* (AIAAJ **21**, 11, p. 1525) Article based on AIAA Paper 82-0998

J83-284 Numerical Simulation of Flow Around a Three-Dimensional Turret. S. C. Purohit, *University of Dayton Research Institute*; J. S. Shang and W. L. Hankey Jr., *Air Force Wright Aeronautical Laboratories* (AIAAJ **21**, 11, p. 1533) Article based on AIAA Paper 82-1020

J83-285 Supersonic Jet Screech Tone Cancellation. Robert T. Nagel, James W. Denham and Athanasios G. Papathanasiou, *North Carolina State University* (AIAAJ **21**, 11, p. 1541) Article

J83-286 A Composite Velocity Procedure for the Compressible Navier-Stokes Equations. P. K. Khosla and S. G. Rubin, *University of Cincinnati* (AIAAJ **21**, 11, p. 1546) Article based on AIAA Paper 82-0099

J83-287 Theoretical Study of Discharge Confinement in an Electron-Beam-Controlled Laser Discharge Cavity. B. N. Srivastava, *Avco Everett Research Laboratory, Inc.* (AIAAJ **21**, 11, p. 1552) Article

J83-288 Nonsteady Flame Spreading in Two-Dimensional Ducts. Malladi V. Subbaiah, *California Institute of Technology* (AIAAJ **21**, 11, p. 1557) Article based on AIAA Paper 81-1348

J83-289 Combustion in a Turbulent Mixing Layer Formed at a Rearward-Facing Step. Robert W. Pitz and John W. Daily, *University of California* (AIAAJ **21**, 11, p. 1565) Article

J83-290 Approximations Method for Space Frame Synthesis. W. C. Mills-Curran, R. V. Lust and L. A. Schmit, *The University of California* (AIAAJ **21**, 11, p. 1571) Article based on AIAA Paper 82-0682 CP824

J83-291 Unified Aeroelastic Flutter Theory for Very Low Aspect Ratio Panels. Gabriel A. Oyibo, *Fairchild Republic Company* (AIAAJ **21**, 11, p. 1581) Article

J83-292 Stagnation-Point Ablation of Carbonaceous Flat Disks--Part I: Theory. Chul Park, *NASA Ames Research Center* (AIAAJ **21**, 11, p. 1588) Article

J83-293 Vortex and Momentum Theories for Hovering Rotors. Alexander H. Flax, *Institute for Defense Analyses* (AIAAJ **21**, 11, p. 1595) Technical Note

J83-294 Effect of Edge-Tone Noise on Supercritical Airfoil Data. L. H. Ohman, *National Research Council of Canada* (AIAAJ **21**, 11, p. 1597) Technical Note

J83-295 Correlation of Hypersonic Stagnation Point Heat Transfer at Low Reynolds Numbers. Shigeaki Nomura, *National Aerospace Laboratory (Japan)* (AIAAJ **21**, 11, p. 1598) Technical Note

J83-296 Implicit, Nonswitching, Vector-Oriented Algorithm for Steady Transonic Flow. Itzhak Lottati, *NASA Ames Research Center* (AIAAJ **21**, 11, p. 1601) Technical Note

J83-297 Applicability of the Independence Principle to Subsonic Turbulent Flow over a Swept Rearward-Facing Step. Gregory V. Selby, *NASA Langley Research Center* (AIAAJ **21**, 11, p. 1603) Technical Note

J83-298 Comparison Between Navier-Stokes and Thin-Layer Computations for Separated Supersonic Flow. David Degani, *NASA Ames Research Center*; and Joseph L. Steger, *Stanford University* (AIAAJ **21**, 11, p. 1604) Technical Note

J83-301 Turbulence Measurements in Confined Jets Using a Rotating Single-Wire Probe Technique. S. I. Janjua and D. K. McLaughlin, *Dynamics Technology, Inc.*; T. W. Jackson and D. G. Lilley, *Oklahoma State University* (AIAAJ **21**, 12, p. 1609) Synoptic based on AIAA Paper 82-1262

J83-302 Stability of Shock Waves Attached to Wedge and Cones. M. D. Salas, *NASA Langley Research Center*; and B. D. Morgan, *Iowa State University* (AIAAJ **21**, 12, p. 1611) Article based on AIAA Paper 82-0288

J83-303 Expansion of a Gas Cloud by the Discrete Velocity Method. Shijie Yu, *Chinese Aerodynamics Research and Development Center* (AIAAJ **21**, 12, p. 1618) Article

J83-304 Experimental and Theoretical Study of Hall Field Limitations in MHD Generators. Wahid Hermina and Charles H. Kruger, *Stanford University* (AIAAJ **21**, 12, p. 1621) Article

J83-305 Unsteadiness of the Separation Shock Wave Structure in a Supersonic Compression Ramp Flowfield. D. S. Dolling and M. T. Murphy, *Princeton University* (AIAAJ **21**, 12, p. 1628) Article based on AIAA Paper 82-0986

J83-306 Effects of Suction on the Gortler Instability of Boundary Layers. Jerzy Floryan, *The University of Western Ontario*; and William S. Saric, *Virginia Polytechnic Institute and State University* (AIAAJ **21**, 12, p. 1635) Article based on AIAA Paper 80-1376

J83-307 The Single-Cycle Scheme: A New Approach to Numerical Optimization. Magdi H. Rizk, *Flow Industries, Inc.* (AIAAJ **21**, 12, p. 1640) Article

J83-308 Conductivity Measurements of Phosphorus-Doped Potassium-Seeded MHD Plasmas. W. Unkel and A. Freedman, *Aerodyne Research, Inc.* (AIAAJ **21**, 12, p. 1648) Article

J83-309 Review of Support Interference in Dynamic Tests. L. E. Ericsson and J. P. Reding, *Lockheed Missiles and Space Company, Inc.* (AIAAJ **21**, 12, p. 1652) Survey Paper based on AIAA Paper 82-0594 CP822

J83-310 Wind Tunnel Wall Corrections Deduced by Iterating from Measured Wall Static Pressure. D. F. Moses, *San Diego State University* (AIAAJ **21**, 12, p. 1667) Article

J83-311 Extrapolation of Space-Simulation Beam-Plasma Investigations to Shuttle-Borne Applications. E. P. Szuszczewicz, *E. O. Hulburt Center for Space Research, Naval Research Laboratory* (AIAAJ **21**, 12, p. 1674) Article

J83-312 Three-Dimensional Flowfield Inside a Low-Speed Axial Flow Compressor Rotor. M. Pouagare, K. N. S. Murthy and B. Lakshminarayana, *The Pennsylvania State University* (AIAAJ **21**, 12, p. 1679) Synoptic based on AIAA Paper 82-1006

J83-313 Erosive Burning. J. P. Renie and J. R. Osborn, *Purdue University* (AIAAJ **21**, 12, p. 1681) Article based on AIAA Paper 79-0165

J83-314 Laser Doppler Velocimeter Measurements in Unsteady, Separated, Transonic Diffuser Flows. J. T. Salmon, T. J. Bogar and M. Sajben, *McDonnell Douglas Corporation* (AIAAJ **21**, 12, p. 1690) Article based on AIAA Paper 81-1197

J83-315 Thrust Augmenting Ejectors, Part II. Morton Alperin and Jiunn-Jenq Wu, *Flight Dynamics Research Corporation* (AIAAJ **21**, 12, p. 1698) Article

J83-316 Supersonic Flow over a Rearward Facing Step with Transverse Nonreacting Hydrogen Injection. Harry A. Berman and John D. Anderson Jr., *University of Maryland*; and J Philip Drummond, *NASA Langley Research Center* (AIAAJ **21**, 12, p. 1707) Article based on AIAA Paper 82-1002

J83-317 One-Dimensional Micromechanical Analysis of Woven Fabric Composites. Takashi Ishikawa and Tsu-Wei Chou, *University of Delaware* (AIAAJ **21**, 12, p. 1714) Article

J83-318 Mechanical Properties of a Fiberglass Prepreg System at Cryogenic and Other Temperatures. Phillip J. Klich and Charles E. Cockrell, *NASA Langley Research Center* (AIAAJ **21**, 12, p. 1722) Article based on AIAA Paper 82-0708 CP823

J83-319 Postbuckling of Orthotropic Composite Plates Loaded in Compression. Manuel Stein, *NASA Langley Research Center* (AIAAJ **21**, 12, p. 1729) Article based on AIAA Paper 82-0778 CP823

J83-320 Large-Amplitude Vibrations of Geometrically Imperfect Shallow Spherical Shells with Structural Damping. David Hui, *The Ohio State University* (AIAAJ **21**, 12, p. 1736) Article

J83-321 Nonlinear Stress-Strain and Strength Response of Axisymmetric Bimodulus Composite Material Shells. David W. Schmueser, *General Motors Research Laboratories* (AIAAJ **21**, 12, p. 1742) Article

J83-322 Stagnation-Point Ablation of Carbonaceous Flat Disks--Part II: Experiment. Chul Park, *NASA Ames Research Center* (AIAAJ **21**, 12, p. 1748) Article

J83-323 Thickness and Camber Effects in Slender Wing Theory. A. Plotkin, *University of Maryland* (AIAAJ **21**, 12, p. 1755) Technical Note

J83-324 Cellular Patterns in Poststall Flow over Unswept Wings. D. Weihs and J. Katz, *Technion-Israel Institute of Technology* (AIAAJ **21**, 12, p. 1757) Technical Note

J83-325 Accuracy of Approximations to the Navier-Stokes Equations. J. D. Murphy, *NASA Ames Research Center* (AIAAJ **21**, 12, p. 1759) Technical Note

J83-326 Decomposition of a Disturbance in Parallel Shear Flows. Thomas F. Balsa, *University of Arizona* (AIAAJ **21**, 12, p. 1760) Technical Note

J83-327 Transient Decay Times and Mean Values of Unsteady Oscillations in Transonic Flow. Earl H. Dowell and Tetsuhiko Ueda, *Princeton University*; and Peter M. Goorjian, *NASA Ames Research Center* (AIAAJ **21**, 12, p. 1762) Technical Note

J83-328 Visualization of Flow Patterns Induced by an Impinging Jet Issuing from a Circular Planform. K. R. Saripalli, *McDonnell Douglas Corporation* (AIAAJ **21**, 12, p. 1764) Technical Note

J83-329 Axisymmetric Density Field Measurements by Moire Deflectometry. J. Stricker, *Technion-Israel Institute of Technology*; E. Keren and O. Kafri, *Nuclear Research Center* (AIAAJ **21**, 12, p. 1767) Technical Note

J83-330 Inlet Flow Distortion in Turbomachinery: Comparison of Theory and Experiment in a Transonic Fan Stage. B. S. Seidel and M. D. Matwey, *University of Delaware* (AIAAJ **21**, 12, p. 1769) Technical Note

J83-331 Linearized Unsteady Flame Surface Approximation Result in Complex Notation. T. S. Sheshadri, *Indian Institute of Science* (AIAAJ **21**, 12, p. 1770) Technical Note

J83-332 Buckling of Thin Plates Using the Collocation Least-Square Method. S. F. Ng, *University of Ottawa* (AIAAJ **21**, 12, p. 1772) Technical Note

J83-333 Influence of Suction on the Developing Wall Flow of an Impinging Jet. N. T. Obot, W. J. M. Douglas and A. S. Mujumdar, *McGill University and Pulp and Paper Research Institute of Canada* (AIAAJ **21**, 12, p. 1774) Technical Note
